

# Index

- ADA deficiency**, 97  
Advance Cell Technology (ACT), 72–73  
Agriculture:  
    biotechnology in, 69–71  
    transgenic animals, 71  
    transgenic varieties, 70–71  
transgenics in, 53–59  
    crop varieties resistant to insects,  
    55–56  
    plant varieties for the production of  
    bioplastics, 56–57  
    plants and animals as bioreactors,  
    58–59  
    varieties resistant to herbicides,  
    54–55  
*Agrobacterium rhizogenes*, 31  
*Agrobacterium* species-mediated trans-  
formation, 31–32  
*Agrobacterium tumefaciens*, 31–32, 36  
Agroterrorism, 161–65  
    Biological and Toxic Weapons Con-  
    vention, 164  
    *Bipolaris maydis*, 163–64  
    Cotton Boll weevil, 164  
    defined, 161  
    detection/monitoring of underground  
    activities, 164–65  
    food industry safety, 161–63  
    incidents, 164  
    mad cow disease, 163  
*Alcaligenes eutropus*, 57  
AllHealthNet Web site, 108  
Alzheimer's disease, 176, 183  
    and stem cell therapy, 96  
American Biological Safety Association  
    Web site, 167  
Amino acids, 9–10, 11, 20, 42–43  
Amplified fragment length polymor-  
phism (AFLP), 114–15  
ANDi, 59  
Animal and Plant Health Inspection Ser-  
vice (APHIS), 65–66  
Anthrax, 152–55, 164  
Antibody production, 58–59  
Anticoagulant production, canola plant,  
58  
Antinori, Dr. Severino, 84–86  
Antisense, 36, 43–44  
Aquinas, Thomas, 186–87  
Arabidopsis, genetic features, 7  
*Arabidopsis thaliana* (mouse ear cress),  
    genetic transformation of, 36  
Arber, Dr. W., 22  
Argentina, biosafety in, 69  
Aspirin, 144  
Auxin, 31  
Avery, Oswald, 8  
***Bacillus anthracis***, 154–55  
*Bacillus thuringiensis* (Bt), 55–56, 67  
Bacteria, 19, 21  
Bacteriophages, 21, 28  
Barley Yellow Dwarf Virus (BYDV), 38  
Beadle, George, 7–8  
Biodefenses:  
    edible vaccines, 160–61  
    recombinant vaccines, 160  
Biodiversity, 139–48  
    biopiracy, 144–48  
    collection, history of, 145–46  
    defined, 140  
    gene banks, 143–44  
    genetic erosion, 142–43  
    importance of, 144  
    microbes, 141  
    preservation of, 140, 141–42  
    reduction in, 140  
Bioethics, 169–92  
    case studies, 188–92  
    ethics:  
        defined, 170  
        and genetic engineering, 171–72  
    eugenics, 183–85  
    genetic privacy, 172–77  
    human cloning, 181–82  
    human life, trading, 179–81  
    races, humans, 178–79  
    stem cells, 182–83  
Biolithics, 33–34  
Biological and Toxic Weapons Conven-  
tion, 164  
Biopesticides, 38  
Biopiracy, 144–48  
    aspirin, 144  
    Brazil, 147  
    defined, 146–47
