Symbols

- unary negation operator, 14, 72, 210
- subtraction operator, 154
!= not equal to operator, 70
% remainder operator, 6, 150
%= compound assignment operator for remainder, 22, 68
%n printf end-of-line format, 37
& AND operator, 7, 91
&& conditional-AND operator, 91
&= compound assignment operator for AND, 22, 68
*= compound assignment operator for multiplication, 22, 68
+ addition operator, 26, 30, 66
  precedence of, 31
+ string concatenation operator, 26, 28, 30, 66
++ increment operator, 56
+= compound assignment operator for addition, 22, 68
/ division operator, 6, 44
/* */ comment delimiters, 42
// end of line comment, 36, 43
/= compound assignment operator for division, 22, 68
< less-than relational operator, 70, 74, 237
<< left shift operator, 60
<<= compound assignment operator for left shift, 22, 68
<= less-than-or-equal relational operator, 70
<=> Perl comparison operator, 156
= assignment operator, 22, 24, 211
-= compound assignment operator for subtraction, 22, 68
== equal-to operator, 30, 70, 211–212
== equal-to operator, vs. equals, 29–31
> greater-than relational operator, 70, 237
>= greater-than-or-equal relational operator, 70
>> right shift operator, 60
>>= compound assignment operator for right shift, 22, 68
>>> unsigned right shift operator, 60
>>>= compound assignment operator for unsigned right shift, 22, 67, 68
?: conditional operator, 19, 237
  operand types and, 177–179
@Override annotation, 139

puzzlers.book Page 272 Thursday, June 9, 2005 10:37 PM

\ escape character, 44, 46
\' single quote escape sequence, 32
\\ escaped backslash, 32
\n newline escape sequence, 32
\t tab escape sequence, 32
\u unicode escape sequence, 35
^ exclusive-OR operator, 18
^= compound assignment operator for exclusive-OR, 17, 22, 68
| OR operator, 91
|= compound assignment operator for OR, 22, 68
|| conditional-OR operator, 91
~ bitwise complement operator, 211

Numerics

42, 175

A

abrupt completion, 78
access modifiers
  hiding fields and, 158
  overriding methods and, 158, 168
accessing nonpublic types, 189–192
acronyms, naming conventions and, 164
addition operator, 30
  precedence of, 31
advanced language features, reflection and, 197
alternate constructor invocation, 124
AND operators
  bitwise, 7
  conditional, 91
  logical, 91
annotations, @Override, 139
annotations, Class, 216
antisymmetric relation, 70
API changes, incompatible, 174
arithmetic

  modular, 73
  two's complement binary, 16, 59, 72, 151
arithmetic operations, type conversions in, 68
arithmetic operators
  overloading, 9, 133
  performance, 7
ArrayIndexOutOfBoundsException, 90, 151
Arrays.asList, 235
Arrays.deepToString, 141–143
Arrays.equals, 142
Arrays.hashCode, 142
Arrays.sort, 154
Arrays.toString, 142, 170
assignment compatibility, 24
assignment operators
  See compound assignment operator
  See simple assignment operator
assignment, definite, 81–83
autoboxing, 152, 169, 213
  operators and, 69–71

B

backslash character, 44, 46
backward compatibility, 173–175
BigDecimal, 9
BigDecimal.signum, 143
BigInteger, 131–133
BigInteger.bitCount, 143
BigInteger.signum, 143
binary compatibility, 231
binary floating-point arithmetic, 8, 63
binary numeric promotion, 20, 21, 212
bit
  masks, 17
  shifts, 59–61
  twiddling, 141–143
bitwise AND operator, 7
blank finals, 81–83
block comments, 41–43
blocking, 200
boxed numeric types, 70
break statements, 49–52

puzzlers.book Page 273 Thursday, June 9, 2005 10:37 PM

buffers, flushing, 197–199
bugs, tools for finding, 3, 50
Byte.MAX_VALUE, 54

C

Calendar problems, 143–145
callback, ObjectInputValidation.validateObject, 227
cast operator, 114
casting, 15–17, 113–114
  hiding and, 159
  unchecked, 95
catch clauses, rules for, 79–81
char
  arrays, string representation of, 28
  concatenation of, 26
character literals, escape sequences and, 33
character sets, 39–41
character vs. integer interpretation, 26
Character.reverseBytes, 143
Charset.defaultCharset, 40
checked exceptions
  catch clauses and, 80
  method declarations and, 41, 80
  re-raising, 204
  static initializers and, 81
Class.forName, return type of, 216
Class.getAnnotation, 216
Class.getName, 28
Class.newInstance, 86, 94
  specification for, 196
  vs. Constructor.newInstance, 95
ClassCastException, 114, 215
classes
  extending inner, 221–223, 229–230
  initialization cycles, 111–113
  initialization of, 119–121, 205–207
    deadlock during, 207
  inner, generics and, 217–220
  library, constants and, 231–233
  member, 197
    static vs. nonstatic, 219
  missing, 97–100
  name reuse, 161–163
  naming, 148, 164
  nested static, type parameters and, 220
  Object.toString and, 28
  precedence of members, 170
  reflection and, 100
  static vs. inner, 223
ClassNotFoundError, 97–100
CloneNotSupportedException, 80
Closeable.close, 88
code migration to generics, 216

    precedence of, 31
  string, 25–27
conditional compilation, 43

puzzlers.book Page 274 Thursday, June 9, 2005 10:37 PM

conditional expressions, 19–21, 237
  operand types of, 177–179
  result types of, 20
conditional operators, 89–91
constant variables, 232
constants
  inheriting from interfaces, 171
  library classes and, 231–233
  vs. magic numbers, 55, 76
  naming, 164
`Constructor.newInstance`, 95
constructors
  exception declarations by, 86
  hidden, serialization and, 201–203
  of inner classes, 195–197
  invoking superclass, 222
  of non-static nested classes, 196
  order of execution in, 86
  overridable methods and, 227
  signatures of, 148
  vs. members, 174
  vs. methods, 147–148
conversions
  See type conversions
  See unboxing conversions
covariant return types, reflection and, 197

D

`Date` problems, 143–145
`Date`, name conflict with, 163
deadlock, 200, 205–207
  during class initialization, 207
  finalizers and, 85
decimal arithmetic, 9
decimal literals, 14
declarations
  obscuring and, 170
  of exceptions, 41
  parameterized, 215
  shadowing and, 170
default constructors, 148
definite assignment, 81–83
deprecated methods
  `Runtime.runFinalizersOnExit`, 84
  `System.runFinalizersOnExit`, 84
  `Thread.stop`, 93
  `Thread.suspend`, 93
deserialization of object graphs, 224–228
`Double.NaN`, 64, 212
`Double.POSITIVE_INFINITY`, 62
`Double.toString`, 8
dynamic dispatch, 180
  static methods and, 110

E

Elvis, 111–113
encapsulation, 159, 173
end-of-line comment, 48
enum constants, 233
enum types, 152, 179
  reflection and, 197
equality
  operators, 70, 71
  reference, 146
  value, 146
`equals`, vs. ==, 29–31
equivalence classes, 211
`Error`, 86
  catching, 100
error streams, draining, 201
escape sequences, 32
  in character literals, 33
  HTML entity, 34
  octal, 32
  in string literals, 33, 44
  Unicode, 31
    in comments, 33–35, 35–37
    compilation and, 32, 36
    vs. escape sequences, 31–33, 37
    obfuscation and, 37–38
    in string literals, 32
    Windows file names and, 34
  vs. Unicode escapes, 31–33
evaluation order, 75–76
`Exception`
  catching, 80
  serialization and, 202
exception checking, bypassing, 93–96
exceptions
  See also checked exceptions
  See also unchecked exceptions
  checking, 96
  `Class.newInstance` and, 94

puzzlers.book Page 275 Thursday, June 9, 2005 10:37 PM

loop control and, 89–91
verification and, 99
exclusive OR operator, 17, 18
exponent in floating-point representation, 72
exponential algorithms, 101–103
expression statement, 48
expressions, evaluation order of, 18, 19
extending inner classes, 221–223, 229–230

F

factorial, 234
fairness of shuffling, 233–237
fencepost errors, 49–52
fields
hiding, access modifiers and, 158
`int`, initial value of, 226
`File.separator`, 45
`final`
fields, hiding and, 171–172
methods vs. fields, 172
finalizers, deadlock and, 85
`finally` clauses
exceptions in, 88
exiting, 78, 88
first common superclass, 99
flags for `javac`
`-source`, 177
`-Xlint:fallthrough`, 50
`Float.NaN`, 212
floating point arithmetic, 8
infinity in, 61–63
NaN, 63–64
floating-point representation, 72, 74
flow analysis, 99
flushing buffers, 197–199
for-each loop, 213
formal parameters, 106

G

generic interface, 214
generics, 152, 213
inner classes and, 217–220
reflection and, 197
type checking for, 95
vs. raw types, 213–216

H

half-open loop form, 74
halting problem, 82
`hashCode` contract, 133–135
`hashCode`, identity based, 134
`HashMap`, 146, 148, 226
serialization and, 228
`HashSet`, serlialization and, 228
`HashSet.readObject`, 226
`Hashtable`, serlialization and, 228
hexadecimal, 14, 31, 37, 54
hexadecimal representation of `int`, 72
hidden constructors, 201–203
hiding, 110, 111, 157–160, 174
casting and, 159
definition of, 180
fields, access modifiers and, 158
final fields and, 171–172
vs. overloading, 109–111
HTML entity escapes, 34

I

identity-based hash-code, 134
`IdentityHashMap`, 145–146
idiom, private constructor capture, 123–124
`if` statement to comment out code, 43
`IllegalAccessException`, 86, 95
`IllegalArgumentException`, 94, 144
immutability, 132
incompatible API changes, 174
inference, of return type, 216
infinite recursion, 85–87
infinity, 61–63
inheritance
of private members, 229–230
vs. composition, 107–109, 184, 194
initialization
of classes, 119–121, 205–207
instance, 115–119
of instance variables, 85–87
of object graph, 226
inner classes
default public constructor of, 196
extending, 221–223, 229–230
generics and, 217–220
vs. static, 223

puzzlers.book Page 276 Thursday, June 9, 2005 10:37 PM

instance
  fields, updating, 220
  initialization, 115–119
  lock, 187
  methods, qualifiers of, 110
  variable initialization, 86
instanceOf, 113–114
instantiation, reflection and, 191
InstantiationException, 86, 95, 196
integer division, 5–7, 9–11
integer literals
  octal values of, 140
  padding, 141
Integer.bitCount, 143
Integer.highestOneBit, 143
Integer.lowestOneBit, 143
Integer.MAX_VALUE, 58, 74, 209–210
  subtraction-based Comparator and, 155
Integer.MIN_VALUE, 58, 72, 151, 210
  Math.abs and, 149–151
Integer.numberOfLeadingZeros, 143
Integer.numberOfTrailingZeros, 143
Integer.reverse, 143
Integer.reverseBytes, 143
Integer.rotateLeft, 143
Integer.rotateRight, 143
Integer.signum, 143
integral types, boundary conditions of, 58
interfaces
  for method invocation, 191
  inheriting constants from, 171
interned strings, 30, 146
InterruptedException, 80, 204
InvocationTargetException, 95
IOException, 80, 88
isInterrupted, 204
ISO-8859-1, 40

J

java.lang, name reuse and, 162
java.lang.reflect.Constructor, vs. Class.newInstance, 196
java.util.concurrent.locks, 187
java.util.regex, 141–143
java.util.ThreadLocal, 124
javac, 50, 177
join points, 99

K

keywords
  final, 172
  null, 126, 232
  super, 159
  this, 124, 223

L

languages, safe vs. unsafe, 99
Latin-1 character set, 40
least common supertype, 178
left shift operators, 59
less-than operator, 74
libraries, development of, 231–233
library classes
  constants in, 231–233
  locking and, 187
line separators, 35–37
line terminators, 36
LinkedHashSet, 141–143
linking, steps in, 99
Liskov Substitution Principle, 160
List, 142
literals, 55
  class, generic types and, 216
  naming of, 12
  string, escape sequences and, 33
  string, in comments, 41–43
  Unicode escapes in, 32
  values of, 14
local variable declaration statements, 127–130
locking, 185–188
  of instance vs. thread, 188
  library classes and, 187
locks, reentrant, 187
logical operators, 89–91
long arithmetic, 10
Long.bitCount, 143
Long.highestOneBit, 143
Long.lowestOneBit, 143
Long.MIN_VALUE, 72
  Math.abs and, 151
Long.numberOfTrailingZeros, 143

puzzlers.book Page 277 Thursday, June 9, 2005 10:37 PM

`Long.reverse`, 143
`Long.reverseBytes`, 143
`Long.rotateLeft`, 143
`Long.rotateRight`, 143
`Long.signum`, 143
loops
  exceptions for control of, 89–91
  types of indices for, 75

M

magic numbers, 55, 76
mantissa, in floating-point representation, 72
`Map`, 146
`Matcher.quoteReplacement`, 46
`Math.abs`, 149–151
`Math.signum`, 143
members, 174
  classes, static vs. nonstatic, 197, 219
  precedence, vs. static imports, 170
  private, inheritance of, 229–230
methods
  exception declarations, 41
  naming, 133, 148
  overloading, 21, 29
  overridable, constructors and, 227
  overriding package-private, 167–168
  overriding, access modifiers and, 158
  signatures of overriding, 139
  synchronized, 184
  unintentional overloading of, 137–139
  vs. constructors, 147–148
migrating code to generics, 216
mixed types
  arithmetic on, 69
  comparisons of, 53–55, 74, 212
  computations with, 13–15, 69
  conditional expressions and, 20
  equality operators and, 71
modular arithmetic, 73
monetary calculations, 7–9
multiple assignments, 19, 55–56
multiplication operator, 76
multithreading, 184
  locking and, 185–188
mutual exclusion, 187

N

name reuse, 161–163, 175
naming
  classes, 148, 164
  conflicts, within Java, 163
  constants, 164
  conventions, 148, 164
    acronyms and, 164
  literals, 12
  methods, 133, 148
  packages, 164
  type parameters, 164
  variables, 11–12, 164
NaN, 63–64
narrowing primitive conversions, 16, 21–23, 67–69
nested classes, reflection and, 197
nesting
  comments, 42
  `try-catch` constructs, 88
`NoClassDefFoundError`, 98
nonstatic member classes, 197, 219
`NoSuchMethodError`, 162
`notify`, 187
`notifyAll`, 187
`null` keyword, 126, 232
`NullPointerException`, 114, 126
numerical comparison operators, 70, 71

O

`Object`, name conflict with, 163
`Object.clone`, 118
`Object.equals`, 118, 134, 176
  overloading, 138, 176
`object.getClass().getMethod(`*`methodName`*`)`, 191
`Object.hashCode`
  contract, 133–135
  identity-based, 134
`Object.notify`, 187
`Object.notifyAll`, 187
`Object.toString`, 28, 170
`Object.wait`, 187
`ObjectInputStream.readObject`, 118, 224–228

puzzlers.book Page 278 Thursday, June 9, 2005 10:37 PM

`ObjectInputStream.registerValidation`, 227
`ObjectInputValidation.validateObject`, 227
objects
  graph, deserialization of, 226
  referencing during deserialization, 228
obscuring, 163–165
  definition of, 182
  syntactic context and, 166
  workaround for, 165–167
octal
  escapes, 32
  literals, 14

Q

qualifiers, 110
qualifying, 111
static members, 166
static methods, 125–126
types
for method invocation, 191
for reflective access, 190
question-mark colon operator
See conditional expressions

R

Random, 236
random number generation, 233–237
raw types, vs. generics, 213–216
real-time guarantee, 186
recursion, 101–103
infinite, 85–87
ReentrantLock, 187
ReentrantReadWriteLock, 187
refactoring
definite assignment and, 83
inner classes and generics, 220
reference equality, 146
reference identity comparisons, 70, 71
reflection, 189–192
advanced language features and, 197
class detection with, 100
instantiating inner classes and, 197
missing classes and, 97–100
reflexivity, 211
regular expressions, 43–45, 141–143
remainder operator, 6, 76, 150
remainders, 5–7
replacement strings, 45–47
result types
of compound assignment operators, 22
of conditional expressions, 20
right shift operators, 60
unsigned, 60, 67

puzzlers.book Page 280 Thursday, June 9, 2005 10:37 PM

`Runtime.addShutdownHook`, 84
`Runtime.runFinalizersOnExit`, 84

S

safe languages, 99
`SecureRandom`, 236
`Serializable`, 202
`Serializable.readResolve`, 203
serialization, 201–203, 224–228
  encapsulation and, 173
`Set`, 142
shadowing, 169–171, 174, 193–195
  in constructors, 181
  definition of, 181
  generics and, 217–220
shift distances, 60
`Short.reverseBytes`, 143
shuffling, 233–237
shutdown hooks, 84
sign extensions, 14, 15, 16, 17, 54
sign-bit, in floating-point representation, 72
significand, in floating-point representation, 72
silent casting, 21–23, 54
silent loss of precision, 212
silent overflow, 10, 11, 57–59, 73, 151, 152–156
simple assignment operator, 22
  operands of, 24
singleton, 201–203
slash character, 45
`-source`, 177
SQL DECIMAL type, 9
`StackOverflowError`, 86, 102
statement labels, 47–48
statements, abrupt completion of, 78
static
  classes
    nested, type parameters and, 220
    vs. inner, 223
  dispatch, 110, 181
  fields, 107–109
  imports, 169–171
  member classes, 197
    vs. nonstatic, 219
  members, accessing, 166
  methods
    dynamic dispatch and, 110
    qualification of, 110, 111
    resolution of, 109–111, 125–126
  nested classes
    type parameters and, 220
static analysis tools, 3, 50
streams, output, flushing, 197–199
`StrictMath.signum`, 143
string concatenation operator, 26, 28, 30
  precedence of, 31
string conversion, 28
string literals
  in comments, 41–43
  escape sequences in, 33, 44
  Unicode escapes and, 32
`String.indexOf`, 41
`String.replace`, 46, 47
`String.replaceAll`, 44, 46
`String.valueOf`, 27, 28
`StringBuffer.append`, 28
strings
  concatenation of, 25–27
  conversion of, 27–29
  interned, 30, 146
`StringTokenizer`, 142
subprocesses, streams and, 199–201
subsumption, 160
`super` keyword, 159
superclasses
  constructor invocation, 222
  first common, 99
swapping variable values, 17–19
`switch` statement, 50
symmetric, 211
synchronization, 185–188
`synchronized` block, reentrant locks and, 187
synchronized methods, behavior of, 184
`System.err`, 198
`System.exit`, 84, 85
`System.halt`, 85
`System.out`, 198
`System.out.flush`, 199
`System.out.print`, 26
`System.out.print(char)`, 198

puzzlers.book Page 281 Thursday, June 9, 2005 10:37 PM

System.out.print(String), 198
System.out.println, 80, 84, 199
System.out.write(int), 198
System.runFinalizersOnExit, 84
systematic bias, 236

T

target typing, 10, 11
this construct, 194
this keyword, 124, 223
Thread(Runnable), 194
Thread.interrupted, 203–205
Thread.isInterrupted, 204
Thread.join, 187
Thread.run, 184
Thread.sleep, 186
Thread.start, 184
Thread.stop, 93
Thread.suspend, 93
threads
  interrupted status of, 204
  state changes of, 203–205
  Thread.run vs. Thread.start, 183–184
Throwable, catching, 80
throws clauses, constructor declarations and, 85
Timer, 186
tools, for detecting bugs, 3, 50
topology-preserving object graph transformations, 146
toString, 28, 170
total ordering, Comparators and, 155
transitivity, 211
  of Comparator, 155
traversal, preorder, 103
truncating integer division operator, 6
try clauses
  checked exceptions in, 87–89
  nesting, 88
  System.exit and, 84
try-finally constructs, 77–78
  flow of control in, 78
  interaction with System.exit, 83–85
  recursion in, 102
  reentrant locks and, 187
  static initializers and, 81
two's-complement binary arithmetic, 16, 59, 151
  asymmetry in, 71–73
type parameters
  naming, 164, 220
  static nested classes and, 220
type tokens, 216
type variable declaration, 166
types
  conversions of, 15–17
    See also narrowing primitive conversions
    See also widening primitive conversions
    byte to char, 17, 40
    byte to int, 54
    byte to String, 41
    char to int, 40, 49–52
    char[] to String, 29
    double to String, 8
    float to int, 73–75
    int to float, 75
    long to double, 75
    long to float, 75
    loss of precision in, 75
    to String, 27–29, 65–66
  erasure of, 95, 213–216
  precedence of, 164
  raw, vs. generics, 213–216
typesafe enum pattern, 179

U

ulp, 61–63
unary negation operator, 14, 72, 210
unboxing, 70, 152
unchecked casts, 95
unchecked exceptions, 78, 119
underflow, 58
Unicode characters, 21
  char as, 28
Unicode escapes, 31
  in comments, 33–35, 35–37
  compiler and, 32, 36
  vs. escape sequences, 31–33
  Windows file names and, 34
unsafe languages, 99
unsigned right shift operator, 60, 67
UnsupportedEncodingException, 41

puzzlers.book Page 282 Thursday, June 9, 2005 10:37 PM

V

value comparisons, 70, 71
value equality, 146
varargs, 169, 213
variables
  multiple assignments of, 19, 55–56
  names, precedence of, 164
  naming, 11–12, 164
  swapping values, 17–19
verification, 99
virtual machine
  exception checking and, 96
  exiting, 84

W

`wait`, 187
white space, ii, vi, 4, 104, 208, 270
  parsing and 36
  for grouping 35
widening primitive conversion, 10, 14, 16, 26, 51, 68
  loss of precision in, 74, 211–212
wildcard type, 215
Windows file names, Unicode escapes and, 34

X

`-Xlint:fallthrough`, 50

Z

zero-extension, 16
