Shared Profile components
command authorization sets configuring, 228–231, 234–237
deleting, 232
editing, 233
testing, 237
troubleshooting, 239–240
downloadable ACLs
configuring, 218–220
troubleshooting, 237–238
NARs
configuring, 221–226
editing, 226–227
removing, 227
troubleshooting, 238
Shared Profile Components menu (ACS), 94
shared secret keys, troubleshooting, 214
Shell Command Authorization Sets, 178,
181–183
shell command authorization sets, versus PIX
command authorization sets, 229
sniffers, 8
software requirements for ACS version 3.2,
76–77
source-ip= attribute, 324
SP (service provider) business model, 341
SSL (Secure Sockets Layer), enabling on
web server, 128
START packets (TACACS+), 19
Start records, 36
Stop records, 36
stripping entries from Proxy Distribution Table,
195
subdirectories, AR, 357–358
suffixes, stripping from Proxy Distribution Table
entries, 195
support for AAA on Cisco devices, 12–13
switches
AAA configuration, 212
ACS configuration, 140
administrative policies, ACS configuration,
142–143
PIX firewalls, AAA configuration, 212
set-based, 212
Wireless APs, AAA configuration, 213–214
synchronizing ACS devices, 277–280
system accounting, 11
System Configuration menu (ACS), 97–99
System Reports (ACS), 300–307
TACACS+, 12–13, 15
accounting, 36
AV pairs, 37–41
reports, 293
ACS user group configuration, 169–178

U
UCP (User Changeable Password) module, 123
installing, 128–132
preparing for installation, 124–127
enabling SSL on web server, 128
unknown user policy, configuring on ACS external databases, 272
usage quotas (ACS user groups), 161
user accounts (ACS)
adding to database, 119–120
authenticating, 120
user authorization, 8
user callback, ACS configuration, 133–134
configuring with TACACS+, 169–178
user groups (ACS), 147–150
advanced group settings, enabling, 149
applying NARs, 158–159
configuring with TACACS+
User Level command authorization, 183
Shell Command Authorization Sets, 178–183
IP assignment, 163–165
max sessions option, configuring, 160
password aging rules, configuring, 161–162
shared NARs, 159
time-of-day access settings, configuring, 152–153
usage quotas, configuring, 161
VoIP support, configuring, 150–151
User Level command authorization, 183
User Password Changes system reports, 304
user profiles, applying to command authorization sets, 236–237
User Setup menu (ACS), 90–91
users, adding to ACS database, 114, 116
V

value added services, 342
VASCO Token Servers, ACS configuration, 265–267
viewing ACS reports, 106
virtual authentication, 6
virtual Telnet, 7
VoIP (voice over IP),
  accounting reports, 294
  ACS user group configuration, 150–151
VSAs (vendor specific attributes)
  3000 series concentrator VSAs, 389–391
  BBSM VSA, 392
  Cisco VPN 3000 Concentrator, 389–391
  Cisco VPN 5000 Concentrator, 392
  IETF attribute value pairs, 392–401, 403
  Juniper RADIUS VSAs, 417
  Microsoft RADIUS VSAs, 404–405
  Nortel RADIUS VSAs, 416

W-X-Y-Z

Windows domain authentication,
  ACS configuration, 132
Windows NT/2000 external databases, ACS configuration, 247–248
wins-servers= attribute, 325
wireless APs, AAA configuration, 213–214
wireless deployment of ACS, 85
wireless hot spots, 341

XTACACS, 15

zonelist= attribute, 325
