INDEX

A

acceptance letter, preparing, 146
accessing IP Telephony Readiness Audit, 41
accounting management, 233
adds, moves, changes, 87
ad-hoc team members (AVVID Tiger Team), 18–19
aliases (email), creating for team members, 98–99
Allred, Doug, 318
availability, five 9s, 240–242
maintaining on new network, 334–335
AVVID (Architecture for Voice, Video and Integrated Data), 358
AVVID boot camp, 227
AVVID Tiger Team, 15
ad-hoc team members, 18–19
core team, 17
roles and responsibilities, 55–56
cross-functionality, implementing, 23–24
ingineering team, roles and responsibilities, 57
executive management sponsorship, 24–26
executive sponsor, 16
roles and responsibilities, 53
finance track lead, roles and responsibilities, 62
LAN team, roles and responsibilities, 57–58
program manager, 17
roles and responsibilities, 54–55
project tracks
financial track, 22
support track, 21
technology track, 19–20
theater track, 22–23
remote field office-theater implementation PM, roles and responsibilities, 59–61
steering committee, 16–17
roles and responsibilities, 53
support track lead, roles and responsibilities, 61
team lead, 17, 54
theater implementation managers, roles and responsibilities, 58–59
third-party partners, 18

B

backing up device files, 242–243
BAT (Bulk Administration Tool), 168, 358
BDF (Building Distribution Frame), 358

best practices
  of change management, 35
  communicating change, 37
  fostering cultural standards, 36
  user familiarity, 38
  support process, 232
  managing support team, 229

Boston, Brad, 341
Bourdet, Reid, 280–282
building team cross-functionality, 23–24
business-critical phone users, identifying, 100–101
  best practices, 102–103
  call center agents, 101–102

C

calculating ROI for Cisco IP Telephony implementation, 5–7
call flow, design considerations, 67–68

CallManager
  monitoring network functions, 238
  providing access to Tier 1 support, 223
  software upgrade checklist, 246–249

CDP (Cisco Discovery Protocol), 358
CDR (Call Detail Record), 359
centralized call processing model, 41
certification, managing in support services, 226–227

Chambers, John, 25
Chancellor, Marisa, 104
change controllers, 254
  role in change management process, 262–263

change management, 27–28, 253
  best practices, 35, 274
  communicating change, 37
  fostering cultural standards, 36
  user familiarity, 38
  change controllers, 254
  change planning, 261
technical description of change, 262
  change readiness, 29
  communication, importance of, 33–35, 264
  documentation, importance of, 266–267
  emergency change management, high-level process flow, 267–270
  in operate phase, 291–292
  IP Telephony Readiness Audit, sample assessment, 41–42
  managing change, 256

risk level of intended changes, 259
IDF (Intermediate Distribution Frame), 360

**Implementation Phase**

- Closeout, 148
- Connecting to voice mail, 163
- Equipment, ordering, 140
- Escalation procedures, 139
- Establishing processes, 141–142
- Implementation team, role in change management process, 264–265
- Installation information, documenting, 140
- Installing equipment, 143–145
- LAN architecture standardization, 150
- Network acceptance letter, preparing, 146
- Phone configurations, 166–167
- Planning meetings, conducting, 139
- Power supplies, 153
- Pre-launch tests, conducting, 146
- QoS, 151–152
- Retrofit Implementation Guide, 171
- Retrofit team, staffing, 172–174
- Risk assessment, 175
- Security, 154
- Site preparation, 141
- Site survey, conducting, 142–143, 164
- System admin tools, 167–168
- Training class content, creating, 140
- User training, 147
- VLAN provisioning, 162–163
- WAN preparations, 156
  - Bandwidth, 156
  - Cabling requirements, 159–160
  - Upgrades, 157–158

**Implementing**

- IP-based communications, 296–297
- Organizational Change Plan, 30

**Importance of team**

- Cross-functionality, 14
- Installing equipment, 143–145
- IP phone configuration template, 132–133
- IP Telephony customer concerns, 354–356
- IP Telephony Readiness Audit template
  - Accessing, 41
  - Sample assessment, 41–42
- IP Telephony Retrofit Efficiency Report, 204
- IP Telephony Retrofit Project Gantt Chart, 205–211
- IP-based communications, implementing, 296–297
- IPCC (Cisco IP Contact Center)
  - Migration strategies, 318–320
    - Benefits of, 325–327
    - Challenges encountered, 324–325
    - ICM project, 320
    - Implementation approach, 322–324
    - Site deployment design, 321

**LAN team (AVVID Tiger Team), roles and responsibilities, 57–58**

**LAN Upgrade Test Procedure, 182**

**LANs, 360**

- Campus model, 41
- Design considerations, 70–72

**LEAP (EAP-Cisco Wireless), 329**

- Lease return dates (PBXs), 280
  - Best practices, 281
  - Deinstallation, 280–281

**Legacy PBXs, design considerations, 67**

**Lessons learned**
