access controllers, 40–42
  authentication, 42
  bandwidth management, 42
  benefits of, 41
  encryption, 42
  subnet roaming, 42
access points, 38
  association, wireless LANs, 122
  bridges, compared, 139
  configuring, 107
  rogue access points, 173
  SSID (service set identifier), 107
  wireless LANs, 106–107
ad hoc wireless LANs, 117
air medium, 37–38
  interfacing with, 59–64
  signals, 31
AirMagnet, 172
AiroPeek, 172
alerts (SMS), 160
amplification, wireless transceivers, 69
analog signals, 56–57
antennas
  directional antennas, wireless MANs, 140–142
  polarization, 142
  wireless LANs, 110
  wireless transceivers, 69
  wireless WANs, 155–156
application connectivity software, 42–45
  direct database connectivity, 44
  terminal emulation, 43
  wireless middleware, 44–45
application integration (SMS), 160
Application layer (Layer 7), OSI Reference Model, 52
applications, wireless applications, 14–21
architectures, networks, 52–54
association, wireless LANs, 122
attacks
  DoS (denial of service) attacks, 176–178
  man-in-the-middle attacks, 174–176
attenuation, light signals, 79
attributes, RF signals, 70–72
authentication, 171, 185
  access controllers, 42
  digital certificates, 41
  IEEE 802.11 authentication, vulnerabilities, 185–186
  IEEE 802.1x, 188–190
  MAC filters, 187
  public key cryptography, 187–188
  RADIUS (Remote Authentication Dial-
  In User Service), 42
  wireless LANs, 121–122
B

bandwidth, 55
bandwidth management, access controllers, 42
base stations, 31, 38–42
  access points, 38
  configurations, monitoring, 198
  gateways, 39
  passwords, assigning, 197
  physically securing, 196–197
  rogue base stations, identifying, 193
  routers, 39
  wireless WANs, 154–155
Bluetooth
  wireless LANs, 97
  wireless PANs, 96–98
    interference, 98–101
    specifications, 7
Bluetooth Special Interest Group (SIG), 96
bridges
  access points, compared, 139
  wireless MANs, 138–140
    Ethernet-to-wireless bridges, 139
    workgroup bridges, 140

C

carrier sense access, DoS (denial of service) attacks, 176
carrier signals, 80
CDMA (code division multiple access), 166
CDPD (Cellular Digital Packet Data)
cellular-based wireless WANs, 157–160
  first generation cellular (1G cellular), 158
  second generation cellular (2G cellular), 158
  third generation cellular (3G cellular), 159–161
CF (Compact Flash) cards, 36
CF (Compact Flash) form factors, wireless PANs, 90
client devices, 42
code division multiple access (CDMA), 166
colleges, wireless LANs, application of, 18
Compact Flash (CF) form factors, wireless PANs, 90
computer devices, 32
  air mediums, 37–38
  infrastructures, 38–48
  management systems, 48–51
  wireless networks, 31, 33–34
    NICs (network interface cards), 34–37
configuration
  access points, 107
  base stations, monitoring, 198
  basic configurations, 14
  management, management systems, 49
  wireless devices, verifying, 192–193
connections, 65–66
  bridges, wireless MANs, 138–140
content delivery (SMS), 160
cryptography, 179
  See also encryption, 179
  public key cryptography, 187–188
CSMA/CA (carrier sense multiple access with collision avoidance) protocol, 118
direct database connectivity, 44
direct sequence spread spectrum (DSSS) physical layers, 124
directional antennas, 140–142
  polarization, 142
displaying information, 58
distributed coordination function (DCF), 118
distribution systems, 46–48, 106
doctors' offices, wireless LANs, 113
DoS (denial of service) threats, 171, 176–178
DSSS (direct sequence spread spectrum) physical layers, 124
Dynamic Host Configuration Protocol (DHCP), 108
data bundling, middleware, 45
data link layer (Layer 2), OSI Reference Model, 53
data rates
  digital signals, 55
  wireless PANs, 5
data signals, transferring, 65
data transmissions, air medium, interfacing with, 59–61
DCF (distributed coordination function), 118
Denial of Service (dos) threats, 171, 176–178
deployment control, 198
DHCP (Dynamic Host Configuration Protocol), 108
digital certificates, 41
digital signals, 54–56
  data rates, 55
  throughput, 56
educational institutions, wireless LANs, application of, 18
encryption, 171, 178–180
  access controllers, 42
  policies, 195
  public key encryption, 179–180, 187–188
  symmetric encryption, 179
  VPNs (virtual private networks), 185
  WEP (Wired Equivalent Privacy), 178, 181–183
    TKIP (Temporal Key Integrity Protocol), 183–184
  WPA (Wi-Fi Protected Access), 184
end points, information flow, 57–58
end system support, middleware, 45
engineering, management systems, 51
enterprise systems, wireless PANs, 94
enterprise wireless LANs, 112–114
Ethernet, 106
Ethernet LANs, wireless LANs, compared, 8
Ethernet-to-wireless bridges, 139

F
FDMA (frequency division multiple access), 165
FHSS (frequency hopping spread spectrum) physical layers, 124
field services, wireless WANs, application of, 20–21
filters, MAC filters, 187
firewalls, 173
personal firewalls, implementing, 198
updating, 196
users, placing outside of, 195
first generation cellular (1G cellular), wireless WANs, 158
flow of information, wireless networks, 57
air medium, 59–64
connections, 65–66
data signal transferrence, 65
der points, 57–58
form factors, NICs (network interface cards), 35–37
CF (CompactFlash) cards, 36
ISA (Industry-Standard Architecture), 35
Mini-PCI cards, 35
PC Card, 35
PCI (Peripheral Component Interconnect), 35
fragmentation, wireless LANs, 123
frequencies, RF signals, 72
frequency bands, wireless LANs, choosing, 128
frequency division multiple access (FDMA), 165
frequency hopping spread spectrum (FHSS) physical layers, 124
FSK (frequency shift-keying), 81
full-duplex lines, 64

G-H
gateways, 39
hackers, 171
half-duplex lines, 64
health care industry, wireless LANs, application of, 17
help desks, management systems, 49
Hertz, 57
highly directional antennas, wireless MANs, 141–142
HiperLAN/2 (High Performance Radio LAN), wireless LANs, 131–133
home and small office systems
wireless LANs, 111-112
wireless PANs, 92
control, 93
Internet connections, 94
printing, 93–94
streaming multimedia, 92–93
synchronization, 92
hospitals, wireless LANs, 113
hotels, wireless LANs, 116
hotspots, public wireless LANs, 114

IEEE 802.11 standard
authentication, 185-186
wireless LANs, 9, 118–120
association, 122
authentication, 121–122
fragmentation, 123
MAC layer, 118–124
physical layers, 124–129
power save mode, 123
RTS/CTS, 122
scanning, 120
WEP, 122
wireless MANs, 145
IEEE 802.15 standard, wireless PANs, 7, 95
IEEE 802.16, wireless MANs, 146–147
IEEE 802.1x, authentication, 188–190
impairments
light signals, 78
attenuation, 79
interference, 79
RF signals
interference, 73–74
multipath propagation, 74–76
Industry-Standard Architecture (ISA).
See ISA (Industry-Standard Architecture)
information flow, 57
air medium, interfacing with, 59–64
connections, 65–66
data signals, transferring, 65
end points, 57–58
information signals, 54
analog signals, 56–57
digital signals, 54–56
Infrared Data Association (IrDA). See
IrDA (Infrared Data Association)
infrastructure, wireless networks, 31
infrastructures, 38–48
access controllers, 40–42
application connectivity software, 42–45
base stations, 38–42
distribution systems, 46–48
inputting information, 58
intelligent restarts, middleware, 45
interactivity (SMS), 160
interfacing with air medium, 59–64
interference
Bluetooth, minimizing, 98–101
light signals, 79
RF signals, 73–74
Internet connections, wireless PANs, home and small office systems, 94
Internet Protocol (IP) packet headers, routers, 108
interoperability, radio NICs, wireless LANs, 106
interviewing users, 192
inventory control, wireless LANs, 17
IP (Internet Protocol) packet headers, 108
IPSec, 42
IrDA (Infrared Data Association), wireless PANs, 101–102
ISA (Industry-Standard Architecture), NICs (network interface cards), 35

QAM (quadrature amplitude modulation), 82–83
spread spectrum process, 83–85
UWB (ultrawideband) modulation, 86
propagation, preparing for, 80–86
Lightweight Directory Access Protocol (LDAP), 42
local-area networks (LANs). See wireless LANs (local-area networks)
location-based services, wireless WANs, applications, 23

end points, 57–58
types, compared, 13–14
users, 32
wireless PANs (personal-area networks), 5-7, 89
applications, 14–21
benefits of, 24–27
Bluetooth, 96–98
interference, 98–101
specifications, 7
data rates, 5
Enterprise systems, 94
home and small office systems, 92
control, 93
Internet connections, 94
printing, 93–94
streaming multimedia, 92–93
synchronization, 92
IEEE 802.15 standard, 7, 95
IrDA (infrared Data Association), 101–102
radio NICs, 90
radio waves, 7
routers, 91
traceivers, 6
USB adapters, 90–91
user devices, 89–90
wireless network types, compared, 13–14
wireless traceivers, 69–70
wireless WANs (wide-area networks), 5, 11-13, 151
applications, 14–21
field services, 20
location-based services, 23
utility companies, 20
vending companies, 21
benefits of, 24–27
CDMA (code division multiple access), 166
CDPD (Cellular Digital Packet Data), 13
cellular-based wireless WANs, 157–160
first generation cellular
(1G cellular), 158
second generation cellular
(2G cellular), 158
third generation cellular
(3G cellular), 159–161
FDMA (frequency division multiple access), 165
SDMA (spatial division multiple access), 167
space-based wireless WANs, 161
meteor burst communications, 164
satellites, 161–163
TDMA (time division multiple access), 166
technologies, 165
user devices, 152
antennas, 155–156
base stations, 154–155
multiple technology support, 167
radio NICs, 153–154
wireless network types, compared, 13–14
WISPs (wireless Internet service providers), 10, 39
workgroup bridges, 140
WPA (Wi-Fi Protected Access), 130, 184
