

CORRECTIONS TO 2nd PRINTING**Chapter 7 - Page 130 - Listing 7.5 should be:**

```
01 var http = require('http');
02 http.createServer(function (req, res) {
03   var jsonData = "";
04   req.on('data', function (chunk) {
05     jsonData += chunk;
06   });
07   req.on('end', function () {
08     var reqObj = JSON.parse(jsonData);
09     var resObj = {
10       message: "Hello " + reqObj.name,
11       question: "Are you a good " + reqObj.occupation + "?"
12     };
13     res.writeHead(200);
14     res.end(JSON.stringify(resObj));
15   });
16 }).listen(8080);
17 var http = require('http');
18 var options = {
19   host: '127.0.0.1',
20   path: '/',
21   port: '8080',
22   method: 'POST'
23 };
24 function readJSONResponse(response) {
25   var responseData = '';
26   response.on('data', function (chunk) {
27     responseData += chunk;
28   });
29   response.on('end', function () {
30     var dataObj = JSON.parse(responseData);
31     console.log("Raw Response: " + responseData);
32     console.log("Message: " + dataObj.message);
33     console.log("Question: " + dataObj.question);
34   });
35 }
36 var req = http.request(options, readJSONResponse);
37 req.write('{"name":"Bilbo", "occupation":"Burgler"}');
38 req.end();
```

CORRECTIONS TO 1st PRINTING**Chapter 22 - Page 411 - First Paragraph - add sentence at end of paragraph.**

"Listing 22.6 shows the `outer.component.ts` file, which loads an external template and stylesheet.

should be:

"Listing 22.6 shows the `outer.component.ts` file, which loads an external template and stylesheet. Line 5 shows the path to the html for the component. Line 6 shows the path to the stylesheet for the component."

Chapter 26 - Page 454 - Second Paragraph - add sentence at end of paragraph.

"Listing 26.8 shows the container directive. This directive has the selector `container` and the inputs `title` and `description`. This directive imports `Directive`, `Input`, and `Output` from `@angular/core` to provide the functionality this directive needs."

should be:

"Listing 26.8 shows the container directive. This directive has the selector `container` and the inputs `title` and `description`. This directive imports `Directive`, `Input`, and `Output` from `@angular/core` to provide the functionality this directive needs. Note that lines 9 and 10 create the inputs `title` and `description`."
