

# INDEX

## A

**absolute referencing, 11-12**

**Access 2007**

- ACD forms, 384
  - creating, 385-386
  - replying to, 386-387
- calculated form controls, creating, 409-411
- data, importing from Outlook, 380-384
- duplicate records, locating with queries, 387
- event handlers, creating, 401-402
- fields
  - data types, assigning, 366
  - default values, 373
  - editing, 378-379
  - input masks, assigning, 369-373
  - selecting values from drop-down lists, 376-378
  - validation rules, assigning, 367-369
- forms
  - conditional formatting, applying, 408-409
  - opening automatically, 399-400
  - shortcut keys, creating for form controls, 406-408
  - tab order, customizing, 405-406
  - write protecting, 405

- inventory value, calculating, 391
- keyboard shortcuts, 461-463
- mailing labels, creating, 421-424
- multi-column reports, creating, 418-421
- order totals, calculating, 392-394
- queries
  - calculated columns, adding, 388-391
  - parameter queries, 394-396
  - topmost values, returning, 388
- reports
  - converting to snapshot file, 424-425
  - current date, inserting, 415-416
  - custom report groups, creating, 411-414
  - page numbers, inserting, 414-415
  - pages breaks, inserting after sections, 416-417
  - sections, inserting at top of columns, 417
  - widowed report records, preventing, 417-418
- required fields, setting up, 374
- switchboard forms, creating, 402-403

- tables
  - hyperlinks, inserting, 379-380
  - Yes/No fields, applying toggle buttons, 403-404
  - valid data, entering, 365
- account numbers, generating, 112-114**
- accounts receivable aging worksheets, building, 123-125**
- ACD (Access Data Collection), 384**
  - messages, replying to, 386-387
- activating Developer tab, 430**
- adding**
  - animations
    - to charts, 260
    - to clip art elements, 263-268
    - to organization charts, 261
  - average values to charts, 198
    - plotting on vertical axis, 200-201
  - calculated columns to queries, 388-391
  - comments to worksheets, 140-141
  - content controls to documents, 83-84
  - custom bullets to slides, 226-228

- dialog box controls to worksheets, 160-162
- drawing guides to slides, 231-232
- Emphasis effects to bullet points, 270-272
- fields to Inbox message list, 302-303
- files to Recent Documents list, 68
- holidays to Outlook Calendar, 339-341
- hyperlinks to tables, 379-380
- live stock price quotes to worksheets, 149-150
- pictures to contacts, 351
- scroll bars to worksheets, 210-212
- scrolling credits to slides, 272-273
- second monitor to slide show, 286-287
- secondary axis to charts, 206-207
- soundtracks to slide shows, 283-285
- standard deviation values to charts, 198
- user's mailbox to your email account, 360-361
- video clips to slides, 268-269
- words to dictionary, 31-33
- worksheet text to charts, 195-198
- adjusting slide times, 278-279**
- aligning objects in presentations, 231-232**
- Analysis ToolPak**
  - installing, 116
  - Random Number Generation tool, 116-117
- analyzing cell values with data bars, 186-188**
- animated GIFs, adding to slides, 268**
- animations**
  - adding
    - to charts, 260
    - to clip art elements, 263-268
    - to organization charts, 261
  - creating, 251-254
  - do's and don'ts, 249-250
  - effects, 252
  - enabling on Web, 296-297
  - triggers, configuring, 255-257
- annotating worksheets, 140-141**
- applying**
  - calculated form controls, 409-411
  - conditional formatting to form values, 408-409
  - custom layout to slides, 232-235
  - custom sounds to transitions, 250-251
  - data bars to selected range, 186-188
  - data validation rules to cells, 107-109
  - effects to bullet placeholders, 257-260
  - formatting
    - to multiple worksheets, 139-140
    - with Format Painter tool, 40
    - with keyboard, 44-47
  - multiple page number formats, 99-100
  - multiple Slide Masters to slides, 236-237
  - percentile-based icon sets, 188-192
- toggle buttons to Yes/No fields in Access tables, 403-404
- worksheet protection, 148-149
- appointments, color-coding in Outlook, 346-347**
- assigning**
  - data types to fields, 366
  - input masks to fields, 369-373
  - shortcut keys to macros, 431-433
    - Excel macros, 433-434
  - validation rules to fields, 367-369
- attachments (email), allowing blocked file types as, 311-315**
- AutoArchive, configuring, 332**
- AutoCorrect feature**
  - boilerplate text, inserting in text, 15-16
  - compatibility with other Office applications, 15
  - dynamic entries, creating, 20-21
  - hyperlinks, creating, 24
  - signatures, inserting in text, 14-15
- AutoDate feature (Outlook), 343-344**
- automatically expanding charts for new data, 206**
- automatically updating fields, 86-87**
- AutoRecover feature, 61**
  - save interval, decreasing, 62-63
- AutoText, saving boilerplate text as Building Block, 16-17**

**average slide times, calculating, 279-280**

**average values**

- adding to charts, 198
- plotting on vertical axis, 200-201

**avoiding**

- duplicate field values, 374-376
- triple delivery during presentations, 269

## B

**backgrounds**

- parchment paper, applying, 93
- random texture, applying, 94-95

**backups, creating on another drive, 66-68**

**bar charts**

- replacing data markers with pictures, 201-202

**Bar of Pie charts, creating, 208-209**

**best-fit trendlines, plotting, 213-215**

**billable time charges, calculating, 77**

**blank calendars, printing, 341-342**

**blocked file types, allowing as attachments, 311-315**

**blocking**

- email, 308-309
- image downloads, 305-306

**boilerplate text**

- inserting with AutoCorrect, 15-16
- saving as AutoText building block, 16-17

**bookmarks, creating cell references, 12**

**bottommost values, returning, 388**

**bound documents, adding gutters, 101**

**break-even point, identifying, 174, 177**

**building accounts receivable aging worksheets, 123-125**

**Building Block Gallery control, 83**

**bullet placeholders, applying effects to, 257-260**

**bullet points, emphasizing, 270-272**

**bulleted lists**

- creating, 47-49
- inserting in slides, 226-228

**burning slide shows to CD, 297-298**

**business forecasting, plotting best-fit trendlines, 213-215**

## C

**calculated columns, adding to Access queries, 388-391**

**calculated form controls, applying, 409-411**

**calculating**

- average slide times, 279-280
- billable time charges, 77
- break-even point, 174, 177
- fiscal quarter of a date, 128-129

future value of investments, 134-136

inventory value, 391

invoice taxes, 11-13

list price of products, 129-130

loan interest, 130-134

loan payments, 132

loan principal, 130-134

maximum loan amount, 134

multiple solutions to a formula, 167, 170

order totals, 392-394

sentence length, 28-30

tiered bonuses, 126

total workdays between two dates, 126-127

**Calendar feature (Outlook)**

blank calendar, printing, 341-342

custom views, creating, 334-337

Day view, customizing time scale, 337

time zone, adding, 337-338

holidays, customizing, 339, 341

natural-language dates and times, inputting, 343-344

starting, 334

Week view, adding time zone, 337-338

**calling contacts in Outlook, 349-352**

**CD tracks, playing during slide shows, 283-285**

**CEILING() function, 128-129**

**cell references, creating with bookmarks, 12**

**cells**

- A1, selecting on all worksheets, 155-156
- data validation rules, applying, 107-109
- excess spaces, removing, 118-119
- highlighting, 182-183
- home cell, selecting, 156-157
- unprintable characters, removing, 119-121

**charts**

- animations, adding, 260
- average values
  - inserting, 198
  - plotting on vertical axis, 200-201
- bar charts, replacing data markers with pictures, 201-202
- Bar of Pie charts, creating, 208-209
- best-fit trendlines, plotting, 213-215
- dynamic ranges
  - naming, 204
  - plotting, 202-205
- expanding automatically to include updates, 206
- forecasted values, plotting, 215-216
- organization charts, adding animations to, 261
- pie charts, exploding slices, 207-208
- scrolling charts, creating, 209-211
- secondary axis, adding, 206-207
- standard deviation values, inserting, 198
- worksheet text, adding, 195-198

**CLEAN() function, 120****clearing Recent**

**Documents list, 69-70**

**click-and-type placeholders, creating, 18-19****clip art, animating elements of, 263-268****CloseAndReopen macro, 64-65****closing documents, 64-66****color-coding**

- appointments in Outlook, 346-347
- email messages, 318-321

**columns**

- formatting, 55
- summing, 9-11
- transposing date to rows, 152

**Combo Box control, 82****command macros, 430**

- running from Visual Basic Editor, 442

**commands**

- internal names, identifying, 64
- Repeat, inserting dummy text, 22-23
- Repeat Header Rows, 9

**comments**

- adding to worksheets, 140-141
- removing from workbooks, 142-143

**compact mode (Outlook), 302****comparing**

- documents, View Side by Side feature, 85-86
- formatting of two text selections, 40-41
- purchasing versus leasing, 136-137

**conditional formatting**

- applying to Access form values, 408-409
- top/bottom rule, 184-186

**configuring**

- Outlook
  - AutoArchive, 332
  - delegate access, 358-359
  - password-protected folders, 328-331
  - spam filter, 306-307
  - triggers for slide objects, 255-257

**conflict handling, 147****consistent formatting, ensuring, 56****constraints, 180****contacts (Outlook)**

- address maps, displaying, 352
- calling, 349-352
- editing, 347, 349
- phone directories, printing, 353
- pictures, adding, 351

**content controls, 81**

- inserting in documents, 83-84

**controlling slide shows with keyboard, 288-289****converting**

- reports to snapshot file, 424-425
- slides to image, 242-243
- smart quotes to straight quotes, 53-55
- text to specific case, 51-53
- Word outlines to PowerPoint presentation, 222-224
- YYYYMMDD dates to Excel dates, 125

**copying**

- formatting with Format Painter tool, 40
- presentations to CD, 297-298

**CreateWorkspace procedure, 72****creating**

- ACD forms, 385-386
- ACD replies, 386-387
- backups on another drive, 66-68
- Bar of Pie charts, 208-209
- bulleted lists, 47-49
- calculated form controls in Access, 409-411
- cell references with bookmarks, 12
- click-and-type placeholders, 18-19
- custom animations, 251-254
- custom blank presentations, 237-238
- custom outline levels, 102-103
- custom report groups in Access, 411-412, 414
- custom slide shows, 285-286
- custom spell check dictionary, 31-33
- custom views in Outlook Calendar, 334-337
- drop caps, 58-59
- dynamic AutoCorrect entries, 20-21
- event handlers in Access, 401-402
- hyperlinks, 24
  - from scratch, 25-26
  - with AutoCorrect, 24
- inline numbered lists, 49-51
- jump text, 91-92

- mailing labels in Access, 421-424
- modules, 441
- multi-column reports in Access, 418-421
- Quick Access toolbar for macros, 434-435
- range snapshots, 166
- scrolling charts, 209-211
- section breaks, 98
- shortcut keys for Access form controls, 406-408
- startup forms, 399-400
- summary slides from macro, 244-246
- switchboard forms in Access, 402-403
- top/bottom rules, 184-186
- trusted locations, 74-75
- watermarks, 93
- workspaces, 70-72, 153-154

**current date, inserting in Access reports, 415-416****custom bullets, creating, 226-228****custom dictionary, creating, 31-33****custom layouts, applying to slides, 232-235****custom outline levels, creating, 102-103****custom report groups (Access), creating, 411-414****custom slide shows, creating, 285-286****custom sounds, applying to transitions, 250-251****custom text, inserting in side footer, 224****custom views, creating in Outlook Calendar, 334-337****customer account numbers, looking up, 111-112****customizing**

- Access forms' tab order, 405-406
- Day view in Outlook Calendar, 337
- fields in Inbox message list, 304
- header/footer, 100
- holidays in Outlook Calendar, 339-341
- Outlook To-Do Bar, 344-346
- Quick Style Gallery, 36-38
- slide shows, 285-286

**D****data bars, analyzing cell values, 186-188****data types, assigning to table fields, 366-369****data validation rules, applying to cells, 107-109****Date Picker control, 83****DATEDIF() function, 128-129****dates, converting YYYYMM-MDD format to Excel dates, 125****Day view (Outlook Calendar)**

- time scale, customizing, 337
- time zone, adding, 337-338

**decreasing, AutoRecover save interval, 62-63****default blank presentations, creating, 237-238****default values, setting for fields, 373**

**delegate access**

- configuring in Access, 358-359
- obtaining in Outlook, 360-361

**deleting drawing guides from slides, 232****dependent variables, 214****descriptions, entering in table fields, 366-367****Developer tab, activating, 430****dialog box controls, adding to worksheets, 160-162****dictionary, adding words to, 31, 33****discount rate schedules, performing lookups, 109-111****discrete value lookups, performing, 111-112****displaying**

- address maps in Outlook, 352
- code for placeholder fields, 18
- column totals, 9-11
- email in plain text, 309-311
- header row on every page, 8
- hidden characters, 30
- Properties dialog box, 75
- text in row-and-column format, 55
- total editing time, 76-77
- word counts, 26-28

**DisplaySentenceLengths() macro, 26-28****distributing slide shows a slide show file, 292-293****Document Inspector, 84****Document Information Panel, enabling, 73****document maps, modifying style, 38-39****document window, splitting, 7****documents (Word)**

- backups, creating on another drive, 66-68
- closing, 64-66
- content controls, inserting, 83-84
- fields, updating automatically, 86-87
- formatting, locking, 78-79
- metadata, 72
  - Document Information Panel, enabling, 73
- most recently used, opening at startup, 68-69
- Properties dialog box, displaying, 75
- total editing time, displaying, 76-77
- viewing side-by-side, 85-86
- workspaces, 70
  - creating, 70-72

**downloading, email, 321-322****drawing guides**

- adding to slides, 231-232
- removing from slides, 232

**drop caps, creating, 58-59****Drop-Down List control, 82****drop-down lists, adding to fields, 376-378****dummy text, inserting**

- with RAND function, 21-22
- with Repeat command, 22-23

**duplicate field values, avoiding, 374-376****duplicate records, locating with queries, 387****dynamic AutoCorrect entries, creating, 20-21****dynamic ranges**

- naming, 204
- plotting in charts, 202-205

**E****editing**

- multiple contacts in Outlook, 347-349
- table fields, 378-379

**effects, 252**

- applying to bullet placeholders, 257-260
- Emphasis effects, adding to bullet points, 270-272
- triggers, configuring, 255-257

**email**

- ACD (Access Data Collection), 384
- attachments, allowing blocked file types as, 311-315
- blocking, 308
- color-coding, 318-321
- displaying in plain text, 309-311
- downloading, 321-322
- follow-up messages, configuring, 315-316
- image downloads, blocking, 305-306
- non-English, blocking, 308-309
- recipients, creating shortcuts, 322-324
- reminders, sending, 316-318
- spam filter, configuring, 306-307

**Emphasis effects, 252****emphasizing bullet points, 270-272**

**enabling**

- Document Information Panel, 73
- slide show animations on Web, 296-297
- structured editing, 80-82

**Entrance effects, 252****even pages, applying custom header/footer to, 100****event handlers, 401**

- creating in Access, 401-402

**example VBA code, how to use, 431****Excel 2007**

- keyboard shortcuts, 451-455
- macros
  - recording, 438-440
  - shortcut keys, assigning, 433-434
- worksheets
  - home cell, selecting, 156-157
  - annotating, 140-141
  - cells, highlighting, 182-183
  - dialog box controls, adding, 160-162
  - formatting, 139-140
  - live stock price quotes, adding, 149-150
  - scroll bars, adding, 210-212
  - text, including in charts, 195-198
  - tracking changes, 143-145

**excess spaces, removing from cells, 118-119****Exit effects, 252****expanding**

- charts automatically for new data, 206
- size of Recent Documents list, 68

**exploding pie chart slices, 207-208****external content, 305****extracting, first/last name from full name, 121-123****F****fields**

- adding to Inbox message list, 302-303
- default values, configuring, 373
- descriptions, entering, 366-367
- drop-down lists, adding, 376-378
- duplicate values, avoiding, 374-376
- editing, 378-379
- in message Inbox, customizing, 304
- input masks
  - applying, 369-370
  - placeholders, 371-373
- updating automatically, 86-87

**files**

- adding to Recent Documents list, 68
- workspaces, creating, 153-154

**FileSave macro, 63****Fill-in fields, inserting in templates, 19-20****FIND() function, 121****finding text with specific formatting, 40****FindLongestSentence() macro, 28-30****first name, extracting from full name, 121-123****fiscal quarter of a date, calculating, 128-129****folders (Outlook), sharing, 354-356**

- via Microsoft Exchange, 356-358

**follow-up messages, configuring, 315-316****fonts, replacing in presentations, 228-229****forecasted values, plotting, 215-216****foreign email messages, blocking, 308-309****Format Painter tool, 40****formatting**

- applying
  - to multiple worksheets, 139-140
  - with keyboard, 44-47
- columns, 55
- comparing between two selections, 40-41
- consistency, ensuring, 56
- email in plain text, 309-311
- locking, 78-79
- modifying, 35-36
- presentation handouts in Word, 246
- removing, 41-42

**forms**

- ACD, creating, 385-386
- calculated form controls, applying, 409-411
- conditional formatting, applying, 408-409
- controls, creating shortcut keys, 406-408
- opening automatically, 399-400
- switchboard forms, creating in Access, 402-403
- tab order, customizing, 405-406
- write protecting, 405

**formulas**

- absolute referencing, 11-12
- field functions, 11
- multiple solutions to, calculating, 167, 170
- what-if analysis, scenarios, 171-173

**fritterware, 77****front-loaded interest charges, 130****function macros, 430**

- how to use, 435-436

**functions, 11**

- CEILING(), 128-129
- CLEAN(), 120
- DATEDIF(), 128-129
- FIND(), 121
- FV(), 134-136
- HLOOKUP(), 110
- IF(), 124
- IFERROR(), 112
- INT(), 115, 129-130
- IPMT(), 130-134
- LEFT(), 122-123
- lookup functions, 109-111
- MEDIAN(), 184
- NETWORKDAYS(), 127
- OFFSET, 204
- OFFSET(), 205, 211
- PERCENTILE(), 189, 192
- PMT(), 132
- PPMT(), 130-134
- PV(), 134, 137
- RAND, inserting dummy text, 21-22
- RAND(), 114
- RANDBETWEEN(), 115
- RANK, 188-190
- RIGHT(), 122-123
- SERIES(), 203
- SUBSTITUTE(), 118-119
- TABLE(), 170
- TRIM(), 118

VLOOKUP(), 109-111

volatile, 115

WEEKDAY(), 124

**future value of investments, calculating, 134-136****FV() function, 134-136****G****generating**

- account numbers, 112-114
- random numbers, 114
- with Random Number Generation tool, 117

**Goal Seek, optimizing profits, 177-182****graphics coprocessors, 287****groups**

- creating, 80-82
- removing, 81

**gutters, adding to bound documents, 101****H****header row, displaying on every page, 8****header/footer, customizing, 100****heading styles, customizing, 102-103****hidden characters, displaying, 30****hidden slides, linking to, 290-292****hiding Slide Master objects from slides, 235-236****highlighting**

- all instances of words, 13-14
- cells, 182-183
- values below median, 184-186

**HLOOKUP() function, 110****holidays, customizing in Outlook Calendar, 339-341****home cell, selecting on all worksheets, 156-157****hyperlinks**

- creating from scratch, 25-26
- inserting
  - in documents, 23-24
  - in tables, 379-380
- pasting, 26

**I****identifying break-even point, 174, 177****IF() function, 124****IFERROR() function, 112****image downloads, blocking, 305-306****images**

- creating from slides, 242-243
- signatures, inserting with AutoCorrect feature, 14-15
- text wrapping, 56-58

**importing data from Outlook to Access, 380-381, 383-384****inbox (Outlook), compact mode, 302****independent variables, 214****initiating calls in Outlook, 349-352****inline numbered lists, creating, 49-51****Input Mask Wizard, 370****input masks**

- assigning to fields, 370
- placeholders, 371-373

**inserting**

- boilerplate text with
  - AutoCorrect, 15-16
- content controls into documents, 83-84
- current date in Access reports, 415-416
- custom text in slide footer, 224
- dummy text
  - with RAND function, 21-22
  - with Repeat command, 22-23
- Fill-in fields in templates, 19-20
- full pathname in slide footer, 225-226
- hyperlinks in documents, 23-24
  - from scratch, 25-26
  - in tables, 379-380
  - using AutoCorrect, 24
- page breaks after report sections, 416-417
- pages numbers in Access reports, 414-415
- signatures with
  - AutoCorrect, 14-15
- installing Analysis ToolPak, 116
- INT() function, 115, 129-130
- integrated development environment, 440
- interest for loans, calculating, 130-134
- introducing slides with video clips, 268-269
- inventory value, calculating, 391
- investments, calculating
  - future value of, 134-136
- invoice taxes, calculating, 11-13
- IPMT() function, 130-134

**J-K****jump text, 91-92****keyboard, controlling slide shows, 288-289. See also keyboard shortcuts**

- keyboard shortcuts**
  - assigning to macros, 431-434
