MyITCertificationLab®

MyITCertificationLabs

MyITCertificationLab is an easy-to-use exam preparation service that tests students' readiness and teaches them what they need to know to pass their IT certification exams. The web-based service has a comprehensive database of hundreds of exam questions that are used to assess a student's knowledge, provide feedback on areas that require further study, and let students practice for the exams.

The MyLab environment allows instructors to interact with students, communicate learning goals, schedule projects, and assess each individual student for areas of competence and need.

Simulators

These state-of-the-art, interactive Simulators provide effective hands-on skills enhancement for the classroom without the investment in expensive lab equipment. They are the perfect classroom learning aid to help students prepare for performance-based questions, which require exam candidates to perform a task or solve a problem within a simulated IT environment to demonstrate specific knowledge or skills. Each simulator contains:

- More than a hundred hands-on labs mapped directly to certification exam objectives
- Scenario-based labs to develop critical thinking and problem-solving skills
- NEW grade history report feature, which is a clean and easy way for students to store, view, and export grade reports
- Built-in mapping to the Pearson texts, for seamless integration from book to simulator
- Hours of video tutorials to support the students' learning and comprehension
