

## IT ESSENTIALS v4.1 WINDOWS 7 LABS

Windows 7 content has been added to both exams required to achieve CompTIA A+ certification: CompTIA A+ Essentials (220-701) and CompTIA A+ Practical Application (220-702). To help ensure the success of Networking Academy instructors and students, these Windows 7 labs provide the content and screenshots that are needed.

These labs must be completed to prepare for the certification, course chapter and final exams, and the Windows 7 exam. If the class does not have access to the Windows 7 operating system and compatible computer equipment, students must complete the labs using the screenshots provided.
