## Symbols

#, pad with spaces in format 58  
\$ in regular expressions 155  
\$, dollar sign 18  
% in clock format 184  
% in event bindings 449  
( ) for arrays 95  
( ) in regular expressions 155  
(?!re) in regular expressions 155  
(?:re) in regular expressions 155  
(?=re) in regular expressions 155  
(?abc) in regular expressions 155  
\* in regular expressions 154  
\*, matching character 53  
\*? in regular expressions 155  
+ in regular expressions 154  
+, format character 58  
+? in regular expressions 155  
-, left justify string in format 58  
. (dot) in regular expressions 154  
/bin/sh to run a Tcl script 27  
/debug, Application Direct URL 282  
/mail, Application Direct URL 283  
/status, Application Direct URL 281  
? in regular expressions 155  
? , string match character 53  
?? in regular expressions 155  
@ in binary format 60  
[] in regular expressions 155  
[] in string match 53  
[ ], command substitution 18  
[. .] in regular expressions 155  
[: :] in regular expressions 155  
[= =] 155  
[incr Tcl] From The Ground Up, book lviii  
[incr Tcl] object system 214  
\, backslash 20  
\0 in regular expressions 157  
\A in regular expressions 156  
\a in regular expressions 156  
\a, bell 20  
\B in regular expressions 156  
\b in regular expressions 156  
\b, backspace 20  
\c in regular expressions 155  
\cX in regular expressions 156  
\D in regular expressions 156  
\d in regular expressions 156  
\e in regular expressions 156  
\f in regular expressions 156

\f, form feed 20  
\M in regular expressions 156  
\m in regular expressions 156  
\n in regular expressions 156  
\n, newline 20  
\r in regular expressions 156  
\r, carriage return 20  
\S in regular expressions 156  
\s in regular expressions 156  
\t in regular expressions 156  
\t, tab 20  
\uXXXX in regular expressions 157  
\v in regular expressions 157  
\v, vertical tab 20  
\W in regular expressions 157  
\x in regular expressions 157  
\xhh in regular expressions 157  
\xy in regular expressions 157  
\xyz in regular expressions 157  
\Y in regular expressions 157  
\y in regular expressions 157  
\Z in regular expressions 157  
\^ in regular expressions 155  
\{} for argument grouping 4  
\{m,n} in regular expressions 155  
\{m,n}? in regular expressions 155  
\| in regular expressions 155  
\~ in file names 124

## Numerics

0, o, in binary format 58  
3D Border 785  
3D relief sampler 614  
3dDarkShadow, system color 622  
3dLight, system color 622  
64-Bit  
    Arithmetic 826  
    Filesystem Support 826  
    Value Conversions 826

## A

A, a, in binary format 60  
abbreviation of commands 179  
-about, regexp option 158  
-above, event option 449  
abs(x), absolute value 21  
AC\_INIT 738  
AC\_OUTPUT 739  
AC\_SUBST 738  
accepting socket connections 240

access time, file 108  
acos(x), arccosine 21  
activate canvas objects 566  
activate, button operation 467  
Activate, window event 439, 442  
activeBackground, widget attribute 620  
ActiveBorder, system color 622  
activeBorderWidth, widget attribute 615  
ActiveCaption, system color 622  
activeForeground, widget attribute 620  
activeRelief, widget attribute 615  
addinput. See fileevent.  
addtag, canvas operation 581  
Advanced Regular Expressions 815  
advanced regular expressions 149  
after, safe alias 308  
after, Tcl command 228  
aliases defined by the browser package 317  
aliases, command 296  
aliases, introspection on 296  
-all, lsearch option 70  
Allocate a Pixmap 786  
Allocation, Memory 769  
alnum, in regular expressions 156  
alnum, string class 54  
alpha, in regular expressions 156  
alpha, string class 54  
Alt, key modifier 444  
alternation in regular expressions 147  
anchor position, pack 404  
Anchor Positions, Text 786  
anchor the selection, entry widget 514  
anchor, widget attribute 616  
anchoring a regular expression 147  
Anchoring text in a label or button 617  
animation with images 627  
animation with update 405, 609  
ANSI\_ARGS 740  
Any, key modifier 445  
app-defaults file 477, 671  
append mode, open 117  
append to clipboard 594  
append to list 66  
APPEND, open mode 117  
append, Tcl command 56  
AppleScript on Macintosh 107  
applets 311  
application activation 442  
application and user resources 483  
application class 476  
application class warning 476  
application deactivation 442  
Application Direct URL 262  
  /debug 282  
  /mail 283  
  /status 281  
e-mail form results. 283  
form handlers 272  
  specifying content type 265  
application embedding 489, 808  
Application Initialization 768  
application name 669, 780  
appname, tk command operation 664  
AppWorkspace, system color 622  
Aqua window system, Mac OS X 670, 831  
arc canvas item 567  
arccosine function 21  
Architecture, Tcl Extension 729  
-archive, file property 115  
arcsine function 21  
arctangent function 21  
argc, Tcl variable 31  
args, example 424, 614  
args, parameter keyword 88, 134  
Arguments and Tcl\_GetIndexFromObj, Parsing 710  
Arguments, Main Programs and Command-Line 779  
argv, saving for window session 662  
argv, Tcl variable 29, 80  
argv0, and Starkit VFS access 355  
arithmetic on text indices 533  
arithmetic operators 20  
array 96  
  ArrayInvert 99  
  collecting variables 99  
  complex indices 100  
  convert to list 98  
  created with variable trace 196  
  empty variable name 818  
  for a Database 41  
  for simple database 100  
  global 182  
  list of 103  
  names of indices 98  
  searching and statistics 828  
  set from list 98  
  syntax 95  
  Tcl command 97  
arrow keys 441  
arrow on canvas 570  
-ascii, lsearch option 70  
ascii, string class 54  
asin(x), arcsine 21  
aspect ratio, message widget 493, 613  
aspect ratio, of window 659  
AssocData for per Interpreter Data Structures 774  
Associating State with Data 92  
asymmetric padding 402, 413  
Asymmetric padding in geometry managers 830  
-async, send option 648  
asynchronous I/O 232

asynchronous message sending, threads 329–330  
atan(x), arctangent 21  
atan2(y,x), arctangent 21  
atime, file access time 114  
Atom and window ID information 668  
atom, in C 787  
attemptckalloc 769  
attemptckrealloc 769  
attribute 371  
    activeBackground 620  
    activeBorderWidth 615  
    activeForeground 620  
    activeRelief 615  
    anchor 616  
    aspect 613  
    background 620  
    bitmap 627  
    borderWidth 615  
    button widgets 459  
    Canvas Widget 586  
    colormap 624  
    colors, all 620  
    configuring in C 781  
    cursor 631  
    disabledBackground 620  
    disabledForeground 620  
    elementBorderWidth 615  
    entry widget 515  
    exportSelection 642  
    file 109  
    foreground 620  
    Frames and Toplevels 486  
    geometry, old 795  
    height 613  
    highlightBackground 616  
    highlightColor 616, 620  
    highlightThickness 616  
    image 625  
    insertBackground 620, 631  
    insertBorderWidth 631  
    insertOffTime 631  
    insertOnTime 631  
    insertWidth 631  
    justify 641  
    Label Widget 491  
    length 613  
    listbox widget 528  
    menu entries 469  
    Message Widget 494  
        of Fonts 636  
    options and resources 372  
    orient 613  
    padX 616  
    padY 616  
    platform-specific window 663  
    readonlyBackground 620  
    relief 615  
    Scale Widget 496  
    scrollbar widget 504  
    selectBackground 620, 642  
    selectBorderWidth 642  
    selectColor 620  
    selectForeground 620, 642  
    setgrid 642  
    size 612

    spinbox widget 515  
    text tags 536  
    text widget 554  
    troughColor 620  
    types, in C 756  
    visual 624  
    width 613  
    wrapLength 641

AUTH\_TYPE, CGI environment variable 280  
auto extracting applications 354  
auto loading and auto\_import 215  
    auto loading, description 178  
    auto, end of line translation 234  
    auto\_import, procedure hook 215  
auto\_index, Tcl variable 31  
auto\_mkindex\_old 811  
auto\_noexec, Tcl variable 107, 179  
auto\_noload, disable library 178  
auto\_path, Tcl variable 172, 177, 180  
autoconf, configure and 732  
autoconf, tcl.m4 file 736  
autoconf, using 736  
automatic decompression 354  
automatic program execution 107, 179  
automatic quoting 65  
auto-repeat, timing control 832

## B

B, b, in binary format 60  
b, regular expression option 157  
back references 151  
background error handler 202  
background errors 771  
background for area covered by insert cursor 515  
background I/O reader 229  
background processes, in C 770  
background, execute in 106  
Background, system color 622  
background, widget attribute 620  
backslash character, \ 20  
backslash escapes in regular expressions 156  
backslash quoting 147  
backslash sequences 7, 18, 20  
backslash-newline, in quoted string 493  
backspace character, \b 20  
BackSpace key 441  
Ball, Steve lviii  
balloon help 678  
basic authentication using http::geturl 256  
baud rate, I/O channel 234  
bd. Synonym for borderwidth.  
Beasley, David 695  
beep. See bell.  
bell character, \a 20  
bell, prevent resetting screen savers 833

bell, Tk command 497  
 bg. Synonym for background.  
 bgerror 771  
 bgerror, background error handler 202  
 binaries, make target 740  
 binary  
     conversion types 60  
     data and file I/O 62  
     data, ByteArrays 773  
     data, pack 59  
     data, unpack 59  
     encoding 221  
     end of line translation 234  
     registry value type 126  
     string support 806  
     Tcl command 59  
 bind, canvas command 582  
 bind, Tk command 435  
 Bind\_Display 685  
 Bind\_Edit 688  
 Bind\_Interface 684  
 Bind\_New 687  
 Bind\_Read 689  
 Bind\_Save 689  
 BindDefine 689  
 BindDragto 687  
 binding 435  
     adding to 436  
     arrow keys 441  
     break and continue 438  
     button modifiers 443  
     canvas object 560, 563  
     canvas selection 595  
     canvas text objects 576  
     class 437  
     command to event 435  
     continue 438  
     destroy window 442  
     different binding tags 438  
     double click 444  
     entry widget 513  
     event syntax 439  
     event types 439  
     execute in the global scope 436  
     global 437  
     in C code 782  
     keyboard events 440  
     listbox  
         browse selection 525  
         extended selection 526  
         multiple selection 527  
         single selection 525  
     Meta and Escape 446  
     mouse events 441  
     order of execution 437  
     scale widget 495  
     scrollbar widget 503  
     sequence of events 445  
     tab key 604  
     tag, defining 439  
     text tags 540  
     text widget 549  
     Tk 4.0 changes 792  
     top-level windows 443  
     user interface for 683  
     window changes size 442  
     window dragging 425  
     X, Y coordinates 449  
 BindMark 687  
 BindSelect 686  
 bindtags, Tk command 437  
 BindYview 686  
 bit blit 629  
 bitmap  
     built-in 627  
     canvas item 568  
     definition in C code 783  
     for icon 661  
     image type 626  
     in label 491  
     on canvas 568  
     widget attribute 627  
 blank, in regular expressions 156  
 blinking cursor 515, 631  
 Blob and BlobState 708  
 blob Command Example 707  
 Blob\_Init and BlobCleanup procedures 709  
 BlobCommand and BlobPoke 716  
 BlobCreate and BlobDelete 713  
 BlobData and BlobN 715  
 BlobNames procedure 714  
 BlobState data structures 708  
 -blocking, fconfigure option 231  
 -blocksize, http::geturl option 252  
 BLT lviii  
 body, http::geturl result 253  
 bold 638  
 bold text 537, 639  
 Bonet, Achim 483  
 book Web site 729  
 book, font weight 638  
 boolean expressions 75  
 boolean preference item 676  
 boolean, string class 54  
 borders  
     3D 785  
     and padding 617  
     and relief attributes 615  
     are drawn in the canvas 558  
     vs. padding, example 618  
 -borderwidth, event option 450  
 borderWidth, widget attribute 615  
 Borenstein, Nathaniel 291  
 bound quantifiers 151  
 bounding box, canvas 582  
 bounding box, of text 551  
 box on canvas 574  
 break, Tcl command 83  
     bindings 438  
 Brouwers, Jean 728  
 browse selection mode, listbox 525  
 browser for the code examples 384

- browser package aliases 317  
Browser Plugin Compatibility 818  
browser Tcl plugin 314  
browser::displayForm 317  
browser::displayURL 317  
browser::getForm 317  
browser::getURL 317  
browser::getURL callbacks 317  
browser::status 317  
-buffering, fconfigure option 231  
buffering, I/O channel 233  
-buffersize, fconfigure option 231  
Building a List 714  
Building Tcl from Source 731  
built-in bitmaps 627  
built-in commands, finding 190  
bulleted list 544  
button 453  
    as event modifier 444  
    associated with a Tcl procedure 456  
    associated with variables 458  
    attributes 459  
    command 380  
    container for 380, 397  
    emulate in text widget 541  
    event option 449  
    fixed width 832  
    fixing a troublesome situation 455  
    image and text together 626  
    minimum width 832  
    mouse as event modifiers 443  
    number, mouse 449  
    operations 461  
    padding 794  
    padding vs. packer padding 402  
    problems with command 454  
    procedures for commands 455  
    relief attributes 831  
    row of 380, 397  
    scope of command 454  
    Tk widget 453  
    user-defined 479  
Button, window event 439  
ButtonFace, system color 622, 623  
ButtonFrame, system color 623  
ButtonHighlight, system color 622  
ButtonPress, window event 439  
ButtonRelease, window event 439

     bgerror, error handler 202, 771  
     binary, convert between string and binary 59  
     break, exit loop 83  
     catch, error handler 83  
     cd, change directory 122  
     close, I/O channel 121  
     concat, concatenate strings and lists 67  
     console, Windows and Macintosh 29, 800  
     continue, loop 83  
     dde, dynamic data exchange 816  
     encoding, character sets 222  
     eof, test end of file 120  
     error, raise error 85  
     eval, evaluate a string 130  
     exec, run programs 106  
     exit, terminate 124  
     expr, math expressions 6  
     fblocked, I/O channel 233  
     fconfigure, I/O channel properties 231  
     fcopy, I/O channel copy 250  
     file, operate on files 108  
     fileevent, select I/O channel 229, 382  
     flush, I/O channel 118  
     for, loop 82  
     foreach, loop 79  
     format, strings 56  
     from C, `Tcl_Eval` 724, 770  
     generating with list 46  
     gets, read line 120  
     glob, match file names 122  
     global, variables 90  
     history, of commands 197  
     if, conditional 76  
     incr, improved version 92  
     incr, increment variable 13  
     info, introspection 186  
     interp, create interpreter 292

- join, merge lists 72  
lappend, append to list 66  
lindex, element from list 68, 71  
linsert, modify list 68  
list for code generation 46  
list, create lists 65  
list-related commands 64  
llength, list length 68  
load, compiled extensions 178, 697  
lrange, list sublist 68  
lreplace, modify list 68  
lset 66  
lsort, sort list 70  
memory, for debugging malloc/free 710  
namespace, variables and procedures 207, 213  
number executed 190  
open, I/O channel 116  
package, manage libraries 176  
pid, get process ID 124  
pkg\_mkIndex, generate package index 173  
proc, define procedures 11, 87  
puts, print line 119  
pwd, get working directory 122  
read, I/O channel 120  
regexp, match regular expression 158  
registry, Windows 126  
regsub, regular expression substitution 162  
rename, commands and procedures 89  
return, from procedure 11, 86  
scan, parsing strings 58  
See also Tk command  
seek, move I/O channel offset 121  
set, getting variable value 13  
set, variable assignment 5  
socket, network 239  
source, read Tcl script file 26  
split, data into list 71  
string, collection of operations 50  
subst, substitute Tcl in data 140  
switch, multiway branch 77  
table of 22  
tell, read I/O channel offset 121  
testthread 815  
time, measure command speed 202  
trace, variables 193  
unknown, command fallback 178  
unset, delete variable 15  
uplevel, evaluate in different scope 138  
upvar, variable references 91  
vwait, wait for event 230  
while, loop 79  
writing commands to files 688
