64-bit caching, 444
64-bit Directory Server packages, 196
80/20 rule, 526
99nispplusLDAPconfig.ldif file, xxviii, 326
99user.ldif file, 441

A

abbreviations, PAM, 178
accepting a server's certificate, 110
access and error log files, 575
access control, 36
access control (Kerberos), 72
access control instruction (ACI), 9, 37, 189
access control list (ACL), 72
access control manager (SLAMD), 507
access control policies, verification of, 37
access hour restrictions, 160
Access Log Viewer, 405
access log, example output, 57
access rights and object data, 332
accessing directory data, 17
account expiration, 160, 168
account management, 156, 175
account management function, 608, 609
account management with PAM, 169

accounting databases, 32
ACI for an entry, 177
ACI management functionality, 37
ACI, incorrectly set, 276
action-related parameters, 316
activating TLSv1/SSL, 126
Add User wizard, 370
add_install_client command, 254
adding a public key to a user entry, 299
adding additional CPUs, 444
adding additional RAM, 444
adding administrators (KDC), 72
adding authorization descriptions, 306
adding auto_master entries, 291
adding entries with the Console, 366
adding execution profiles, 307
adding extended user attributes, 304
adding group entries, 291
adding job classes for SLAMD, 535
adding modules and modifying properties, 109
adding more replicas, 444
adding new entries with ldapaddent, 357
adding non-user entries with the Console, 368
adding PAM modules, 170
adding principals, 87
adding profile descriptions, 306
additional schema definitions, 328, 329
addprinc command, 88
addSchema.ldif file, xxviii
adjusting client cache, 416

- Administration Server application, 194
- Administration Server Console, 131
- Administration Server Console plug-in, 194
- administration state file, 225
- administration tools, 348, 361
- Administration URL, 133
- administrative interface (SLAMD), 508, 517
- administrative tasks, 399
- aggregated controllers, 474
- alarms, tools for sending, 405
