Borland® C++Builder™ 6 Developer's Guide

Warning and Disclaimer

Every effort has been made to make this book as complete and as accurate as possible, but no warranty or fitness is implied. The information provided is on an "as is" basis. The author and the publisher shall have neither liability nor responsibility to any person or entity with respect to any loss or damages arising from the information contained in this book or from the use of the CD or programs accompanying it.

When reviewing corrections, always check the print number of your book. Corrections are made to printed books with each subsequent printing. To determine the printing of your book, view the copyright page. The print number is right-most number on the line below the "First Printing" line. For example, the following indicates the 4th printing of a title.

Misprint	Correction
Page 494, first paragraph, fourth line: Ttimer should be Ttimer	
Page 495, text in the Note **Some type of** handle **identifies all window resources**. Examples of entities **with** handles include modules, processes, threads, frame windows, menus, bitmaps, icons, cursors, and color space.	**A** handle **is used to identify a specific window resource or entity**. Examples of entities **that are referenced by** handles include modules, processes, threads, frame windows, menus, bitmaps, icons, cursors, and color space.

page 662, code below the paragraph after the note.
