### **Warning and Disclaimer**

Every effort has been made to make this book as complete and as accurate as possible, but no warranty or fitness is implied. The information provided is on an "as is" basis. The author and the publisher shall have neither liability nor responsibility to any person or entity with respect to any loss or damages arising from the information contained in this book or from the use of the CD or programs accompanying it.

When reviewing corrections, always check the print number of your book. Corrections are made to printed books with each subsequent printing. To determine the print number of your book, view the copyright page. The print number is the right-most number on the line below the "First Printing" line. For example, the following indicates that this is the 3rd printing of this title and it was printed in January 2005.

*First Printing: July 2005*

08 07 06 05            4 3 2

### **Corrections**

| <b>Pg</b> | <b>Error</b>   | <b>Correction</b>   |
|-----------|--|---|
| 156       | customer_id INTEGER UNIQUE,  | customer_id INTEGER,  |
| 355       | Remove the footnote (and the reference to the footnote contained in table 7.3)   |   |
| 356       | PostgreSQL does not supports statement-level triggers at the moment, so the only valid choice was FOR EACH ROW. Inside of the trigger function, TG_LEVEL can contain either ROW or STATEMENT; but the only value currently implemented is ROW. | PostgreSQL supports statement-level triggers starting with release 7.4 - prior to release 7.4 the only valid choice was FOR EACH ROW. Inside of the trigger function, TG_LEVEL can contain either ROW or STATEMENT. |
