I Planning Your Site 6

1 Deciding What to Do 8

What works on the web 9
10 thing the web can do for you 11
Writing a mission statement 12
A model mission statement 12
Stating your goals 13
What kind of goals? 13
Typical goals 13
Setting goals for a company site 14
Action section: What will you do with your web site? 15
Deciding what goes on the site 16
Setting your priorities 16
Making a blue-sky list 16
Identifying core features 17
Prioritizing features 17
Importance 17
Easiness 18
A prioritization process 18
Prioritization Chart 19
Action section: What features will your web site include? 20

Take Action! Writing a Plan 21

Why bother writing a plan? 22
The basic plan 22
Don't get paralyzed! 23
The basic product plan 24
Action section: Writing your product plan 29

2 Naming Your Site 30
Choosing a name 31
Registering your name 32
3 ways to name your site 33
Choosing a suffix 34
Understanding web addresses 34
Acquiring a domain name 35
Action section: What will you name your site? 36

3 Sizing Up the Competition 38
Identifying competitors 40
Where competitors come from 40
Where to look for competitors 40
Action section: Who is your competition? 41
Evaluating competitors 42
Financial analysis 42
Functional analysis 42
Understanding your competitors 42
Action section: How good is your competition? 43

4 Getting to Know Your Users 44
Learning about your users 46
Quantitative vs. qualitative research 46
Key steps in user research 47
Tools for user research 48
Profiling your users 50
Surveying your users 51
Estimating audience size 52
Action section: Who are your users? 53
Visualizing your users 54
Creating personas 54
Lesson from the trenches: You are not your user 55
Creating scenarios 56
Segmenting your users 56
Action section: Create personas for your users 57
Predicting what users will want 58
Tools for learning what users want 58
Lesson from the trenches: Your site is not the center of the user's universe 59
Understanding user needs 60
Planning a new site 60
Task analysis 60
Converting tasks into site features 61
Getting good results from task analysis 61
Understanding user behavior 62
Traffic analysis 62
Usability testing 62
Tools for understanding user behavior 62
Customer feedback 63
50 ways to lose your users 64

Take Action! Making Money 67
The revenue models 68
4 steps to making money online 68
Considering your options 69
Why pick just one 69
5 online revenue models 70
Making money from product sales 72
What customers want 72
Making money from advertising 73
What advertisers want 73
Making money from user fees & subscriptions 74
What subscribers want 74
Making money from match-making 75
What match-seekers want 75
Online payment options 76
Action section: How will you make money? 77

II Designing Your Site 78

5 Designing for the Web 80
The well-designed web site 81
Designing for the user 82
10 ways to make your site more usable 83
Designing for web conventions 84
Lesson from the trenches: Why you should follow design conventions 85
How people see web sites 86
Visual Conventions on (and off) the web 87
Designing for HTML 88
5 keys to HTML design 88
Toolbox: Choosing software for web design 89
Designing for different systems 90
Where's the fold? 91
Designing for speed 92

6 Organization & Navigation 96
The well-organized site 97
Site organization 98
Structuring your site 99
Lesson from the trenches: Your site shouldn't mirror your company 99
Lesson from the trenches: How to create the information architecture 101
6 ways to organize your site 102
Creating fun categories 105
Documenting site structure 108
Site navigation 110
8 bad ideas for site navigation 110
A little theory for you: How people navigate the web 111
Global and local navigation 112
Balancing layers of navigation 112
Why pull-down menus are not for navigation 113
Creating a navigation system 113
12 Navigation systems 114
Action section: How will your site be organized? 120
Action section: How will your site be navigated? 121
Naming site sections 122
What does "jargon" mean? 123
Choosing consistent names 124
A few good examples 125
Lesson from the trenches: Why section names should be clear, not clever 126
Strange names 127
Action section: How will you name your site sections? 128

Take Action! Usability Testing 129
5 types of usability tests 130
What you can learn from usability tests 131
And what you can't learn 132
Usability testing on the cheap 133
Lessons from the trenches: How usability testing can go wrong 136

7 Visual Design 138
What visual design does for your site 139
Front door design 140
8 design tips for non-designers 143
5 raging debates in web design 144
Color on the web 146
Choosing the right colors 146
The many meanings of color 146
6 tips on choosing colors 147
Creating a color system 148
RGB vs. CMYK color 148
Making color work on the web 149
Understanding hex color 149
Typography on the web 150
Choosing a typeface 150
Serif vs. sans-serif font 150
On-screen legibility 151
Verdana: the web's first font 152
Formatting text 153
Is it a font or a typeface? 153

8 Understanding Design Technologies 154
Html & xhtml 155
Stylesheets 155
Plug-ins 155
Client-side scripts (javascript) 155
Server-side scripts (asp, php) 155
Java applets 155
How'd they get that look? 156
Understanding xhtml 158
Html & xhtml: what's the difference? 158
What you need to know about xhtml 158
Transitioning to xhtml 159
Converting html to xhtml 159
Understanding tables 160
Learning to use tables 160
What you need to know about tables 160
Understanding frames 161
Learning to use frames 161
What you need to know about frames 161
Understanding stylesheets 162
What you need to know about stylesheets 162
Learning to use stylesheets 163
Understanding javascript 164
What you need to know about javascript 164
Learning to use javascript 165
Other programming options 165
Understanding flash 166
What you need to know about flash 166
Learning to use flash 167
Understanding php 168
What you need to know about php 168
Php vs. other server-side scripts 169
Learning to use php 169
Other server-side scripting options 169

III Building Your Site 170

9 Building for the Web 172
Top 10 reasons your site is so stinkin' slow 173
Why sites are slow 175
How slow is too slow? 175
Building for compatibility 176
Planning for compatibility 176
Compatibility testing 177
An industry snapshot 177
Action section: How will you make your site compatible? 178
Building for reliability 179
Improving reliability 179
Fixing a broken site 180
Building for accessibility 182
It's not just nice—it's smart 182
And in america, it's the law 182
Accommodating disabled visitors 182
5 easy fixes to make your site more accessible 183
Building your site to last 184
Why standards are needed 184
How web standards work 185
So what's the hold-up? 185
Lesson from the trenches: Why you should follow web standards 186
Building the backend 188
A note on open-source technologies 188
Sorting out backend technologies 189

10 How Web Sites Work (A Primer) 190
Creating an html document 191
3 ways to build a web site 192
Expert Advice: What makes good web design? 193
Picturing how html works 194
Building your first web page 196
How web pages turn into a web site 198
Naming web pages 198
Organizing web pages 198
Linking between pages 199
Transferring web pages 199
How web pages are served 200
Serving "dynamic" pages 201
Understanding the server 201

11 Preparing Images and Multimedia for the Web 202
Understanding compression 203
How compression works 204
Understanding memory 205
Measuring the size of a file 205
Measuring the capacity of a computer 205
Images on the web 206
Choosing an image file format 207
Preparing images for the web 208
Audio on the web 210
Why background music can backfire 210
Choosing a format for online audio 211
Preparing audio for the web 212
Video on the web 214
Choosing a format for online video 215
Preparing video for the web 216

Take Action! Improving Site Speed 219
The well-built web site 220
Building for speed 221
A speedy site in 6 steps 222
Action section: How will you improve site speed? 225

12 Adding Applications to Your Site 226
Choosing the right technology 228
Avoiding potential pitfalls 228
Evaluating a new technology 229
Action section: 10 questions to ask before choosing a new technology 230
Developing software for your site 231
Building the right team 233
Developing the application 234
Documenting how it works 234
Lesson from the trenches: How to work with engineers 236

IV Maintaining Your Site 238

13 Monitoring & Evolving Your Site 240
Studying your site 242
Evaluating how people use your site 243
Sources of traffic to your site 244
Getting to the source 244
Measuring traffic 245
How traffic data is collected 245
Key advice on measuring traffic 245
An inexact science 245
How the rating systems work 246
Toolbox: Choosing software for traffic analysis 247
Creating a traffic report 248
What to look for 248
Action section: A sample traffic report 249
Investigating changes 250
What makes traffic spike? 250
Typical traffic patterns 251
A year's forecast 252
The january surge 252
The summer slump 252
Autumn growth 253
The december dip 253
Exceptions to the rule 253
Evolving your site 254
Time.com—small changes, big impact 254
Testing your theories 255
Focusing on what matters most 255
Lesson from the trenches: How MSN got people to click (a million time over) 256
Lesson from the trenches: How webmonkey became a (profitable) library 258
Lesson from the trenches: How gURL.com learned what girls want (games!) 260
Lesson from the trenches: How BlackPlanet got users to register (and pay) 262
How is your site used? 264
Action section: How is your site used? 265

Take Action! Increasing Traffic 267
5 quick traffic tips 268
Getting started 268
50 ways to increase traffic 269
Attracting new visitors 270
Keeping visitors around longer 272
Bringing visitors back more often 274
Action section: How will you increase traffic? 276

14 Promoting Your Site 278
6 keys to promoting your site 279
Word-of-mouth strategies 280
Affiliate programs 280
Tell-a-friend programs 280
Clever ways to "tell-a-friend" 281
Email strategies 282
6 things email can do for you 282
Choosing an email strategy 283
Collecting email addresses 283
Choosing an email strategy 284
Setting up an email list 286
Should you buy a list? 286
Choosing software for email newsletters 287
Lesson from the trenches: 12 secrets of successful emails 288
Linking strategies 290
Links from search engines 290
Why links matter (3 times over) 290
Links from directories 290
Links from other sites 290
Types of links: top-lever and "deep" 291
How many sites link to you? 291
Headlines on other sites 292
Paid links 292
Online advertising 294
Crafting a successful campaign 294
Clickthrough isn't everything 295
Steal these ideas: 6 ads that get noticed 296
Where to advertise? 298
Choosing a site 298
4 ways to pay for ads 298
Action section: What to ask before you place an ad 299
Targeting ads 300
Content targeting 300
User targeting 300
Types of ads 301
Banners 301
Buttons 301
Skyscrapers 301
Pop-ups and leave-behinds 302
"Rich-media" ads 302
Text ads 301
Sponsored links 302
Endorsements 302
Online ad standards 303
Sponsorships 304
Product placement 304
Video ads 304
Interstitials 304
Cross-Media strategies 305
Action section: How will you promote your site? 307
Action section: How will you promote your site? 308

Take Action: Improving your Search Rank 309
First understand how it works 310
Then make a plan 310
If all else fails… 310
Getting listed in search engines 311
Getting listed in directories 311
Getting listed 311
Lesson from the trenches: getting into Yahoo! 312
Improving your rank in search engines 313
Steal this idea: how a top-ranked site got there 316
Action section: how will you improve your search rank? 317

15 Managing a Web Project and Team 320
Managing a web project 321
Clarify what you're creating 321
Decide how decisions will be made 321
Learn how to say no 322
Create a "process" 322
Lesson from the trenches: how to save a schedule that's slipping… 323
Apply what you already know 323
Lesson from the trenches: how to set a schedule that sticks 324
Lesson from the trenches: how to run a brainstorming session 326
Managing a web team 328
Lesson from the trenches: how to speak the language(s) 329
Lesson from the trenches: how to encourage collaboration 330
Assembling a web team 332
The core team 332
The extended team 334
Structuring your web team 338
The web company 338
The corporation & the web agency 339
The small business & the consultant 340
Lesson from the trenches: how to get everyone on board 341

Appendix 342
