

Table of Contents

Foreword xvii

Introduction xix

Part I Starting Out 1

1 Planning and Structuring Content	3
Know Your Audience	3
Customer Types: Tomäto or Tomäto	4
Reader Types Versus Customer Types	6
Experience Types	7
Liberation Through Audience Limitations	8
Gathering Content	10
Where Things Go Wrong	10
Getting the Content Right: I've Learned This Lesson Before, But Never Like This	13
The Mistake of Design Before Content	14
Ensure Proper Communication	16
Guide, Don't Tell	17
Structured Markup Is Why We Are Here in the First Place	17
HTML Terrorists	18
Blame the Browsers	18
CSS: Terrorist Rehabilitation	19
Content Structuring Exercise	22
Include Navigation	24
Review Content for Design Possibilities	29
2 Designing for the Unknown	31
Web-Safe Colors	32
Using Web-Safe Colors	33
HTML Tables for Layout	33
Types of Web Page Layouts	37
Solid Designs	37
Liquid Designs	38
Suspension Designs	39
Problems Attempting to be Exact on the Web	39
Use Percentages When Possible	44
Ems as an Alternative	46
Vertical Values, Parent's Width	46
Practice Is Much Different Than Theory	47
Pushpin Design	47
Why to Use a Pushpin	52

Part II Using CSS 53

- 3 Setting Up Style55
 - Getting to Know Style55
 - Declaration55
 - Selector55
 - Associating Styles to a Web Page58
 - Inline59
 - Embedded59
 - Linked59
 - @import62
 - Development Tips from Style Associations62
 - Use External Associative Methods62
 - Exploring the link Method62
 - Excluding Netscape Navigator with @import63
 - Windows Flicker with @import65
 - CSS Aids: The Way Things Are65
 - Learn to Love the Box Model66
 - Color Your CSS66
 - Distance Units67
 - class Versus id68
 - div Versus span68
 - Pseudo-Classes and Pseudo-Elements74
 - Incorporating CSS Ideally76
 - The Cascade79
 - Inheritance80
 - Links, Specificity, and Math81
- 4 Laying Out Pages85
 - Jeffrey Zeldman on Web Standards and Development85
 - Interview with Jeffrey Zeldman86
 - Splash Pages90
 - Traditional Splashes: A Practical Example91
 - Column Layouts99
 - Two-Column Layout99
 - Three-Column Layout117
- 5 CSS for Dynamic HTML129
 - Steven Champeon on Dynamic HTML129
 - Slight of Hand: Dynamic HTML in Action134
 - Changing More Styles on-the-Fly138

Manipulating Images Using DHTML	141
Hiding and Showing Page Elements	148
Resizing Form Fields	153
Do Something Different	153
JavaScript: Great Power, Great Responsibility	158
Recommended Reading	159

Part III Advanced CSS 161

6 Creating CSS for Beyond the Screen	163
Designing CSS for Print	163
Remove the Clutter	165
Designing the Heart of Printed Content	166
CSS for Audio Presentation	175
The Aural CSS Properties	176
Potential Strategies for Coding Aural CSS	180
7 Utilizing PNG and SVG with CSS	185
PNG	185
Interview with Greg Roelof	185
Alpha Transparency	189
Built-In Gamma Correction	192
The Bad News About PNGs	193
SVG	194
Interview with J. David Eisenberg	194
Graphics from Text	196
Applying CSS to SVG	198
Reality Check for SVG Development	200
Reality Check for SVG Usage	200
The Future of PNG and SVG	201

Part IV Launching Progressive Design with CSS: Deconstructions 203

8 Business Publishing	205
A Company News Page	205
Minor Bugs	206
Valid Hacks and Workarounds	208
E-Commerce Shopping Cart Page	211
Horizontal Navigation Through CSS	223
Online News Magazine Layout	223

- 9 Independent Publishing .235
 - Personal Site .236
 - Creating the Daily Blog Entry Design .238
 - E-Zine .249
 - Main Navigation .258
 - The Site's Title .258
 - The Background Image .259
 - Main Image .259
 - The Header .260
 - The Rest of the Layout .260
- 10 Underground Styles .261
 - Drafting Table/Transformer Stylized with SVG .261
 - HTMinimaList Stylized Site with a Mondrian Twist .264
 - Breakdown of the CSS Used in This Site .267
 - Don't Hesitate. Dive In. .272

Part V Appendixes 273

- A Formatting Exercises .275
 - Example 1: Basic Headline and Paragraph .276
 - Example 2: How to Create a One-Pixel Headline Rule .277
 - Example 3: How to Create a Ten-Pixel Headline Rule .278
 - Example 4: How to Create a Dotted Line .278
 - Example 5: How to Create Large, Bold, Type .279
 - Example 6: How to Create Small, Bold Text .280
 - Example 7: How to Create a Simple, Centered Headline .281
 - Example 8: How to Create a Right-Justified Heading .281
 - Example 9: Enclosing the Headline in a Thin Lined Box .282
 - Example 10: Indenting the First Line of the Paragraph .283
 - Example 11: Indenting the Paragraph and the Headline .284
 - Example 12: How to Create a Hanging Indent .284
 - Example 13: How to Create a Hanging Headline .285
 - Example 14: How to Create a Variation of the Hanging Headline .286
 - Example 15: How to Insert Background Texture .287
 - Example 16: How to Add Color to the Header's Background .287
 - Example 17: How to Insert a Larger Background Image .288
 - Example 18: How to Insert a Rule Above the Header .289
 - Example 19: How to Insert a Rule Below the Header .290
 - Example 20: How to Insert a Space Below the Header .290

Example 21: How to Insert a Rule Below the Header with Some Padding	291
Example 22: How to Insert Two Rules	292
Example 23: How to Create a Larger Headline and Keep the Double Rule	293
Example 24: How to Insert an Image Between the Double Rule	293
Example 25: How to Create a Stressed Headline Rule Under the Header	294
Example 26: How to Create a Right-Justified Stressed Header	295
Example 27: How to Center, Add a Box, and Add an Image to the Headline	296
Example 28: How to Insetting the Headline in the Text and Add a Rule	296
Example 29: How to Right-Align Example 28	297
Example 30: How to Create an Outlined Variation of Example 28	298
Example 31: How to Create an Outlined Variation Flushed Right	299
Example 32: How to Add a Background Image to a Paragraph	299
Example 33: How to Make Your Text Look Trapped	300
Example 34: How to Insert a Bold Box on the Left Side ..	301
Example 35: How to Add a Thick Line	302
Example 36: How to Shelter the Header and Change the Leading and Typeface	303
Example 37: How to Enclose the Heading in a Thin Line and Add Padding	303
Example 38: How to Enclose the Heading with a Wide Width on the Side Borders	304
Example 39: How to Add a Thick Top Rule and a Thin Bottom Rule Around the Header	305
Example 40: How to Add a Thin Top Rule and a Bottom Dotted Line Around the Header	306
Example 41: How to Make the Top Line Thicker	306
Example 42: How to Make the Bottom Line Thicker	307
Example 43: How to Make the Top Headline Rule Larger Than the Headline	308
Example 44: How to Make a Strong Initial Cap	309
Example 45: How to Add the Header on Top of a Strong Initial Cap and Bold the First Word in the Paragraph	310
Example 46: How to Enclose the Headline in a Thick Ruled Box	311
Example 47: How to Insert an Image into the Thick Ruled Box	312

Example 48: How to Tuck the Header into the Paragraph	313
Example 49: How to Tuck the Header and Indent the Paragraph to Add a Dynamic to an Otherwise Dull Layout	314
Example 50: How to Tuck the Header While Indenting Both the Header and Paragraph	315
B CSS Reference	317
C HTML 4.01 Reference	329
D HTML to XHTML Conversion Tips	335
Use a Valid DTD and Include Namespace	336
Inlined JavaScript and Style Sheets Should Be Free of Certain Characters	336
Keep Only Clean Nests	336
Fragment Identifiers: Name and ID Have the Same Value	337
Closing Tags Are Not Optional	337
All Elements Should Be Lowercase	337
Slash Empty Elements	338
Avoid Line Breaks in Attribute Values	338
Quotes Around Attribute Values	338
Where There's an Attribute, There's a Value	339
Ampersands in Attribute Values	339
Index	341
