Misprint	Correction
<p>Page 109 Figure 6.5 - shading too dark.</p>	 <p>The diagram shows two Windows 2000 systems. The left system is labeled 'Windows 2000 Initiator' and contains an 'App or Service Client', 'IPSec Policy Agent', 'IKE (ISAKMP)', 'IPSec Driver', 'Filters', 'TCP/IP', and 'NIC'. The right system is labeled 'Windows 2000 Responder' and contains an 'App or Service Server', 'IPSec Policy Agent', 'IKE (ISAKMP)', 'IPSec Driver', 'TCP/IP', and 'Filters'. A double-headed arrow connects the IKE (ISAKMP) components of both systems.</p>
<p>Page 116 Figure 6.7 - shading too dark.</p>	 <p>The diagram illustrates the process of establishing IPsec Security Associations (SAs) between a client and a server. On the left, a 'Client (Respond Only) Policy' is shown with the text: "Send in clear, secure traffic only if requested. Trust domain members." On the right, a 'Secure Server Policy' is shown with the text: "Secure from me to any destination, all traffic. Trust domain members." An 'Application' is connected to an 'IPSec Driver' on the server. An 'IKE' message with a 'ticket' is sent from the client to the server. Below, a 'Windows 2000 domain controller' (containing an 'Active Directory' and 'Key Distribution Center (KDC)') issues a 'Session Ticket' to the server and a 'TGT' to the client. The text 'IPsec SAs Established' is centered between the client and server.</p>

This errata sheet is intended to provide updated technical information. Spelling and grammar misprints are updated during the reprint process, but are not listed on this errata sheet.
