

Numerics

802.11, Wi-Fi, 58

A

- access network, 47**
 - backbone, 48–49
 - fiber-optic networks, 49
 - phone-line networking, 60
- access speeds, 8**
 - Mbps, 8–9
 - broadband network tasks, suggested data rates, 11–12
- activities of teleworkers, 100**
- adoption time for new technologies, 5**
- ADSL (asymmetric DSL), video streaming, 30**
- advantages of teleworking, 101–102**
 - environmental benefits, 103
 - productivity, 103
- advocacy groups, TechNet, 68–69**
- Allenby, Braden, 101**
- always-on technologies, 12–14**
 - connectivity, 90–93
 - security, 61–62
- America Online (AOL), 19**
- analog technologies, 24**
 - modems, 25
- applications of broadband**
 - business applications, 72–73
 - educational applications, 76
 - entertainment applications, 77–78
 - government applications, 74
 - healthcare applications, 75–76

- architecture of cable systems, 36**
- ARPA (Advanced Research Projects Agency), 3**
- availability of broadband**
 - as economic force, 70–71
 - as national priority, 69–70
 - tracking, 69

B

- Babbio, Larry, 127**
- Bach, Robbie, 121**
- backbone, 48–49**
 - data capacity in U.S., 70
 - fiber-optic networks, 49
- bandwidth, 48**
- barriers to teleworking, 101**
- Bell, Alexander Graham, 22**
- Benhamou, Eric, 69**
- bits, 8**
- Bluetooth, 60**
- BPI (baseline privacy interface), 62**
- Brinks, Kevin, 79**
- broadband**
 - advocacy groups, Technet, 68–69
 - and dot.com economy, 17, 20
 - as economic force, 70–71
 - building blocks, 22
 - corporate networks*, 26–27
 - digital revolution*, 23–24
 - modems*, 25
 - business applications, 72–73
 - defining, 10
 - educational applications, 76
 - entertainment applications, 77–78
 - future applications of, 4

- future services, 14
- government applications, 74
- healthcare applications, 75–76
- origins of, 21–22
- tracking availability of, 69
- widespread availability as national imperative, 69
- building blocks of broadband, 22**
 - corporate networks, 26–27
 - digital revolution, 23–24
 - modems, 25
- Bush administration’s initiatives to foster competition, 130–133**
- business applications of broadband, 72–73**

C

- cable modems**
 - history of, 34–41
 - IP addresses, 53
 - PIDs, 53
 - public-access channel, 39
 - two-way architecture, 40
- cable network technologies**
 - architecture, 36
 - nodes, 56*
 - business model, 39
 - CMTS, 51–52
 - DOCSIS, 39–44, 51
 - product certification, 44–45*
 - headend, 51
 - reverse path, 37
 - traffic allocation schemes, 50
- CableLabs, 43**
- Carterfone, 25**
- central offices, 28**
- certification of DOCSIS products, 44–45**
- Chambers, John, 69**

- CLECs (Competitive Local Exchange Carriers), 31**
- CMTS (Cable Modem Termination System), 51–52**
- comparing online activities of broadband and dialup users, 81–82**
- competition among broadband providers, impact on prices, 130–133**
- condensed baseball games, 109**
- consumer cost of broadband per household, 71**
- content, 109–110**
 - entertainment, 117
 - downloading files, 119*
 - movies-on-demand, 117–119*
 - providers, RealNetworks, 111
 - repurposed material, 110
 - streaming media, 112
 - ESPN Motion, 113*
 - telephony, 122
 - VoIP, 122*
 - user-generated, 114–115
 - video, 112, 115–116
 - video games, 120
- corporate networks as building blocks of broadband, 26–27**
- cost of broadband per household, 71**
- Crandall, Robert, 128**
- crosstalk, 55**

D

- data rates, 8**
 - of analog modems, 25
 - suggested rates for network broadband tasks, 11–12
- defining broadband, always-on, 12–14**
- delivery schemes, PONs, 132**

development

- of broadband, 3
- of cable technologies, 41
 - cable modems*, 36
 - DOCSIS*, 41–45
 - MCNS*, 43
 - public-access channel*, 39
 - reverse path*, 37
- of DSL, 29

devices

- cable modems, 53
- DSL modems, 54
- DSLAMs, 55

DHCP (Dynamic Host Configuration Protocol) servers, 53**dialup customers, reluctance to convert to broadband, 71****digital revolution as building block of broadband, 23–24****distance-learning, 129****diversity of residential broadband users' online activities, 84****DOCSIS (Data Over Cable Service Interface Specification), 39–44, 51, 54**

- product certification, 44–45

dot.com economy versus broadband economic revolution, 17, 20**downloading**

- bandwidth, 48
- movies, 119

DSL

- ADSL, video streaming, 30
- HDSL, 29
- history of, 27–28
 - ISDN*, 28–29
 - Telecommunications Act of 1996*, 31–34
 - video streaming*, 30
- modems, 54

DSLAM (Digital Subscriber Line Access Multiplexer), 55**DSPs (digital signal processors), 24****E****E1 lines, 29****e-commerce, 116****economic issues, 70–71**

- dot.com economy versus broadband revolution, 17, 20
- revenue generated by broadband, 18

education

- broadband applications, 76
- distance-learning, 129

effect of broadband on quality of life, 68**electromagnetic spectrum, 49****Elfer, Bill, 35****entertainment, 117**

- broadband applications, 77–78
- file-sharing services, 119
- movies-on-demand, 117
 - downloading files*, 119
- video games, 120

environmental benefits of teleworking, 103

- impact of broadband, 106

ESPN Motion, 113**Ethernet, 50****F****Fellows, Dave, 41****fiber-optic networks, 49****fiber-to-the-home, 132****file-sharing services, 83–84**

- Napster, 119
- MP-3, 120

firewalls, protecting always-on systems, 62
future applications of broadband, 4, 14

G

gaming online, video games, 120
Gilfillan, S.C., 4
Glaser, Rob, 111
Gore, Albert, 2
government applications of broadband, 74
government policies to develop broadband, 130–133

H

HDSL (high bit-rate digital subscriber line), 29
headend, 37, 51
healthcare applications of broadband, 75–76
HFC (hybrid fiber-coax) architecture, 54
higher education, distance-learning, 129
history
 of cable modems, 34–41
 DOCSIS, 39–44
 of DSL, 27–28
 ISDN, 28–29
 Telecommunications Act of 1996, 31–34
 video streaming, 30
Home Phone Networking Alliance, 60
home premises networks, 59, 87–88, 118
 networked appliances, 88
 in the kitchen, 88–90
HomePNA, 60
Horrigan, John, 82
Hybrid Network Technologies, 39

I

impact of broadband on economy, 128
inception of broadband, 21–22
information highway, 1
information snacking, 2, 85
In-Stat/MDR, projected broadband subscription rate, 6
international markets
 China, 127
 developing countries, 129–130
 South Korea, 126
Internet, 3
 access speeds, 8
 Mbps, 8–9
 backbone, 48–49
 unused backbone data capacity, 70
Internet cafes in Arab countries, 67
IP (Internet Protocol), 48
 cable modem IP addresses, 53
IrDA (Infrared Data Association), 60
ISDN (Integrated Services Digital Network), 28–29
ITAC (International Telework Association & Council), 97

J-K

Jackson, Charles L., 128

Ka-band satellites, 57
Kaldor, Sean, 85
Kennard, William, 16
kitchens, networked appliances, 88–90
Kunitake Ando, 6

L

- last mile, 28, 47**
 - wireless broadband, 57–58
 - versus home-based networks, 59
- layers of OSI reference model, 58–59**
- legislation, Telecommunications Act of 1996, 31–34**
- Liikanen, Erkki, 19**
- local loop, 28**

M

- Mbps (megabit per second), 8–9**
- McKerlich, Ian, 109**
- MCNS (Multimedia Cable Network System), 43**
- medical applications of broadband, 75–76**
- Mehlman, Bruce, 98**
- Miller, Jon, 19, 85**
- MMDS (Multichannel Multipoint Distribution Services), 57**
- modems, 25**
 - as building block of broadband, 25
 - cable modems, 53–54
 - DSL modems, 54
- modulation, 51**
 - QAM, 52
- Movielink, anti-piracy protection, 119**
- movies-on-demand, 117**
- MP-3, music file-sharing, 120**
- multiplayer video games, 121**
- multiplexing, 55**
- music, MP-3 format, 120**

N

- Napster, 119**
- narrowband, 9**
- National Broadband Task Force, 16**
 - suggested data rates for broadband network tasks, 11–12
- networked appliances, 88**
 - in the kitchen, 88–90
- new technology adoption times, 5**
- nodes, 56**

O

- OECD (Organization for Economic Cooperation and Development), 5**
- online activities of broadband users, 81–82**
 - diversity of, 84
 - file sharing, 83–84
 - information snacking, 85
 - web searches, 83
- online content, 109–110**
 - entertainment, 117
 - downloading files, 119*
 - file-sharing services, 119*
 - movies-on-demand, 117*
 - RealNetworks, 111
 - repurposed material, 110
 - streaming media, 112
 - EPSN Motion, 113*
 - telephony, 122
 - user-generated, 114–115
 - video, 115–116*
 - video streaming, 112
 - video games, 120
- online retail sales in South Korea, 127**
- origins of broadband, 21–22**
- OSI reference model, 58–59**
