ERRATA

Page 379

The last sentence on the page should read:

“Finally, `handleEvent` represents the function you created for handling the event.”

Page 410, step 8

The first sentence of the second paragraph should read as follows.

The parameter `_blank` is the same method for opening a browser window that you chose from a menu in step 3 of the first task in this section, “To create a text link to a URL.”

Page 410, step 9

The movie that you create in this task has two buttons. When you preview the action as directed in step 9, the first button that appears is one that you scripted as part of the template document. Clicking this button advances the movie to the next frame. Click this button until you reach frame 5. Clicking the button in frame 5 makes the default browser open a new window or tab with the URL you specified.
