A

AAM (Alternate Access Mapping), settings, 694-695

Access 2007

exporting list information to databases, 381-382

input request emails, 382-383

linking list information to databases, 380

reporting tools, 385

SharePoint 2007 lists, creating 385

Access view (document library), 272

Actions menu (document libraries), 174

Alert Me option, 178

Connect to Outlook option, 176, 370-371

Export to Spreadsheet option, 177

Open with Windows Explorer option, 176

View in Datasheet option, 176

View RSSFeed option, 177

active/active clustering, 59

active/passive clustering, 59

AD (Active Directory)

linking Exchange Server 2007 to forest, 640-641

Office Communications Server 2007

domain preparation, 659

installation, 655-658

preparing forest, 658-659

Add Digital Signatures option (Word 2007, Prepare menu), 345

administration, SharePoint 2007

- administrative access, Run As command, 523-524
- administrator passwords, changing, 592
- backup and restoration, 32-33
- best practices analyzer, 33-34
- ISA Server 2006, 35
- MOM, 34

administrative tools

- Central Admin tool, 481
 - application management, 493-503
 - Backup and Restore category, 490
 - content deployment, 492-493
 - Data Configuration category, 492
 - Global Configuration category, 487-489
 - Logging and Reporting category, 484-486
 - Security Configuration category, 484
 - Topology and Services category, 482
 - Upgrade and Migration category, 486-487
- Internet Information Services (IIS) Manager, 516
- Office Communications 2007, 670
 - adding users, 671
 - client component, 674-675
 - components, 671
