

APPENDIX C

Available Online

Online content is available to provide add-on value to readers of *System Center 2012 Orchestrator Unleashed*. You can download this material, organized by chapter, from www.informit.com/store/system-center-2012-orchestrator-unleashed-9780672336102. This content is not available elsewhere. Note that the authors and publisher do not guarantee or provide technical support for the material.

PowerShell Scripts for the Operations Manager IP

Chapter 13, “Integration with System Center Operations Manager,” includes runbooks for group maintenance mode using the Operations Manager integration pack (IP). This incorporates PowerShell scripts to start and stop maintenance mode, which are available online as content for this book.

PowerShell Scripts for the Virtual Machine Manager IP

Chapter 16, “Integration with System Center Virtual Machine Manager,” includes a PowerShell script to create a Virtual Machine Manager (VMM) 2012 cloud. It also includes a script to set custom properties on a virtual machine (VM). These scripts are included as downloadable content for this book.

IN THIS APPENDIX

- ▶ PowerShell Scripts for the Operations Manager IP
- ▶ PowerShell Scripts for the Virtual Machine Manager IP
- ▶ Scripts for Data Center Automation
- ▶ Live Links

Scripts for the Data Center Automation

Chapter 19, “Runbook Automation in the Data Center and the Cloud,” includes a script to import a Service Manager SMlet and CSV file. This script is also available as downloadable content.

Live Links

Reference URLs (see Appendix B, “Reference URLs”) are provided as live links. These include nearly 100 (clickable) hypertext links and references to materials and sites related to Orchestrator.

A disclaimer and unpleasant fact regarding Live Links: URLs change! Companies are subject to mergers and acquisitions, pages move and change on websites, and so on. Although these links were accurate in mid-2013, it is possible that some will change or be “dead” by the time you read this book. Sometimes the Wayback Machine (www.archive.org/index.php) can rescue you from dead or broken links. This site is an Internet archive, and it will take you back to an archived version of a site...sometimes.
