| xxi  | First bulleted item | Reads: Scane the listing  
Should read: Scan the listing | 7/27/2012 |
| xxiii | First paragraph | The URL given for the practice files is easy to misread. The capital letter "I" which appears after the "k" in the word "LinkId" is easy to mistake for a lowercase "L."  
Reads: go.microsoft.com/fwlink/?LinkId=192153  
Should read: http://go.microsoft.com/fwlink/?Linkid=192153 | 2/1/2011 |
| xxv  | Second paragraph | The URL given for the book's errata page is easy to misread. The capital letter "I" which appears after the "k" in the word "LinkId" is easy to mistake for a lowercase "L."  
Reads: go.microsoft.com/fwlink/?LinkId=192153  
Should read: http://go.microsoft.com/fwlink/?Linkid=192153 | 2/1/2011 |
| 71   | Last sentence | This behavior was somewhat erratic when Access 2010 was first released. To respond to the reader's concern, we moved the Troubleshooting paragraph from page 72 to the bottom of page 71. | 7/19/2013 |
| 110  | Step 12 | Reads: Twenty records are displayed in the filtered table.  
Should read: Nineteen records are displayed in the filtered table. | 7/19/2013 |

| 110  | Step 12  | Reads:  
In the employeeID field, right-click 7, and then click Equals 7.  
Should read:  
In the EmployeeID field, right-click Emanuel, Michael, and then click Equals "Emanuel, Michael." | 2/1/2011 |
| 119  | "Saving Filters as Queries" section, steps 1 and 2 | Should read:  
1. On the Home tab, in the Sort & Filter group, click the Advanced Filter Options button and then click Advanced Filter/Sort.  
2. Again on the Home tab, in the Sort & Filter group, click the Advanced Filter Options button and then click Save As Query. | 11/14/2011 |
| 133  | Step 15  | Should read:  
When you created this report, alternate group headers were shaded with the same color as alternate data rows. This coloring confuses rather than clarifies the report structure. Let’s turn off this alternate group header color. | 1/4/2013 |
| 151  | Step 7   | Reads:  
Access rounds the value you entered to the nearest whole number.  
Should read:  
Access rounds the value you entered to the nearest whole number. Because you chose Standard when setting the data type for this field in the previous exercise, the whole number is displayed as 2.00. | 11/14/2011 |

| 171  | "Multicolumn Lookup Lists" section | Should read: Multicolumn Lookup Lists  
If you want people to be able to select a friendly name from a list but you want the database to store a more compact name or number, you can create a two-column lookup list that associates the two types of entries.  
To set up a multicolumn lookup list:  
1. Create a new lookup field, and indicate on the first page of the Lookup wizard that you want to type the values.  
2. On the second page, change the Number Of Columns setting to 2, and then enter the data you want Access to store in Col1 and the friendly name in Col2.  
3. On the third page, indicate which column contains the data to be stored in the database.  
4. Assign a name to the field, select the Limit To List check box, and click Finish.  
Clicking the field’s arrow will then display a two-column list from which the user can select an entry. The stored value will be displayed in the field.  
To display only the friendly name in the list and in the table:  
1. Switch to Design view.  
2. In the Field Properties area, on the Lookup tab, change the Column Widths property from 1";1" to 0;1".  
3. Save the table. | 1/4/2013 |
<p>| 224  | Clean Up (next to blue X) | CLEAN UP should read: Close the query, saving your changes if you want to. Retain the GardenCompany08 database for use in later exercises. | 7/19/2013 |
| 232  | Exercise         | SET UP should read: You need the GardenCompany08 database you worked with in the preceding exercise to complete this exercise. Open the GardenCompany08 database, create a copy of the Products table as described in the Important note on the previous page, and then follow the steps. | 1/4/2013 |
| 245  | Step 12          | Should read: Point to the border of the CategoryName text box control (not the gray handle), and drag the control into the CategoryName Header section. | 7/19/2013 |
| 248  | Step 7, figure caption | Should read: You can specify options for both the date and time controls in this dialog box. | 1/4/2013 |</p>
