Microsoft® Exchange Server 2010 Best Practices

ISBN: 978-0-7356-2719-2

First printing: July, 2010

To ensure the ongoing accuracy of this book and its companion content, we've reviewed and confirmed the errors listed below. If you find a new error, we hope you'll report it to us on our website: www.microsoftpressstore.com/contact-us/errata.

Page	Location	Description	Date corrected
xxvi, xxxiii	"Chapter 15" section, "Acknowledgments" section	Page xxvi reads: Notes from the Field: "Considerations for Local Security of Exchange Servers" by Erick Szewczyk Should read: Notes from the Field: "Considerations for Local Security of Exchange Servers" by Erik Szewczyk Page xxxiii, first paragraph reads: …Erick Szewczyk,… Should read: …Erik Szewczyk,…	11/1/2010
xxvii	First paragraph, third-to-last sentence	Reads: Exchange 2010 provides new features such as Exchange Control Panel (ECP), Domain on the Middle Tier (DoMT),… Should read: Exchange 2010 provides new features such as Exchange Control Panel (ECP), Directory on the Middle Tier (DoMT),…	11/1/2010
xxxi	Second paragraph, first sentence	Reads: Stanley Riemer Should read: Stanley Reimer	11/1/2010
24	Table 1-4, ninth bulleted item	Reads: RBAC management has been improved. This bulleted item should be deleted because it duplicates information in the bulleted item that begins with "Manage RBAC Roles Groups…."	11/1/2010

Page	Location	Description	Date corrected
24	Table 1-4	Reads: Manage RBAC Roles Groups and User Roles (covered in more detail in Chapter 16). Should read: Manage RBAC Role Groups and User Roles (covered in more detail in Chapter 16).	11/1/2010
37	First paragraph, second sentence	Reads: The cmdlet used to format the output as a table is the Format-Table cmdlet, which has a commonly used alias of fl. Should read: The cmdlet used to format the output as a table is the Format-Table cmdlet, which has a commonly used alias of ft.	
85	"Perimeter Network" section, middle of third paragraph	Reads: Putting these roles between a firewall could cause... Should read: Putting a firewall between these roles could cause…	11/1/2010
111	"About Digital Certificates" section, second paragraph, last sentence	Reads: The public key is used to encrypt data for you and is required by everybody that wants to security communicate with you. Should read: The public key is used to encrypt data for you and is required by everybody that wants to securely communicate with you.	
125	Table 3-11, second row, Data Path column	Reads: Autodiscover service, Availability service, Outlook Web App (OWA), Outlook Anywhere, Exchange ActiveSync, Client Access server to Client Access server for Exchange ActiveSync and OWA Should read: Autodiscover service, Availability service, Outlook Web App (OWA), Outlook Anywhere, Exchange ActiveSync, Client Access server to Client Access server for Exchange ActiveSync and OWA, Outlook accessing Offline Address Book (OAB)	4/8/2011
125	Table 3-9, last row	The last row, which is the entry for "Outlook accessing Offline Address Book (OAB)," should be deleted.	4/8/2011
126	Table 3-11	The following row should be added to the end of the table: In the Data Path column, add: Remote PowerShell to Client Access Server In the Required Ports column, add: 80/TCP,443/TCP (SSL) In the Encrypted by Default column, add: Yes	4/8/2011

Page	Location	Description	Date corrected
151	"Internet Calendar Sharing" section, first paragraph, penultimate sentence	Reads: Public certificates, on the other hand, can be logically deduced and then viewed by others over the Internet. Should read: Public URLs, on the other hand, can be logically deduced and then viewed by others over the Internet.	11/1/2010
204	Figure 5-1	Figure 5-1 needs to be changed in the following way: The arrow from "Submit from: Outbox" to "Mail Submission Service", from "Mail Submission Service" to "Store Driver," and from "Store Driver" to "Submission Queue" should be dotted instead of solid.	
206	First paragraph, second sentence	Reads: …and content conversation. Should read: …and content conversion.	11/1/2010
261	Last paragraph, second sentence	Reads: Each database is represented by a single instance of the ESE instance and shares a single set of transaction log files. Should read: Each database is represented by an instance of ESE and a separate set of transaction log files.	11/1/2010
292	Step 1, second sentence	Reads: If there is a replica available in that public folder,… Should read: If there is a replica available for that public folder,…	4/8/2011
349	Note reader aid	Reads: MRM requires an Exchange Server 2010 Enterprise Client Access License (CAL) for every mailbox configured for MRM. Should read: MRM requires an Exchange Server 2010 Enterprise Client Access License (E-CAL) for every mailbox configured for personal retention tags (in the case of retention policies) or managed custom folders (in the case of managed folders).	4/8/2011
349	Note reader aid	The following should be added to the end of the Note reader aid: Users with MRM policies on their mailbox cannot have an Archives mailbox created, nor can users already having an Archive mailbox have MRM policies applied to them.	4/8/2011
374	First paragraph, third sentence	Reads: ...and by default a newly created discovery mail has no.... Should read: ...and by default a newly created discovery mailbox has no…	4/8/2011

Page	Location	Description	Date corrected
382, 383	Last sentence	Reads: Office 2003 Standard and Office 2007 Professional can access RMS-protected content only; they cannot access RMS-protect content. Should read: Office 2003 Standard and Office 2007 Professional can access RMS-protected content only; they cannot RMS-protect content.	4/8/2011
493	First bulleted item lead-in	Reads: Suspend-MailboxDatabasaeCopy Should read: Suspend-MailboxDatabaseCopy	4/8/2011
557	Top of page, first line	Reads: ...run the Eseutil /r e00 /i /d command to bring it to a clean state. Should read: ...run the Eseutil /r e00 /i /d command. If the database is still in Dirty Shutdown state, use ESEUTIL /P <database.edb> to clean the state.	4/8/2011
563	Fourth paragraph, last sentence	Reads: Get-MailboxStatistics –Database <recovery database> |ft DisplayName. MailboxGuid, ItemCount Should read: Get-MailboxStatistics –Database <recovery database> |ft DisplayName, MailboxGuid, ItemCount	4/8/2011
563	Third paragraph	Reads: To create and mount a recovery storage group, the following steps are necessary: Should read: To create and mount a recovery database, the following steps are necessary:	4/8/2011
572	Step 5	Reads: 5. When Eseutil is finished, the database is in clean shutdown state. You can now decide how to continue: Should read: 5. When Eseutil is finished, verify the state of the database by using the Eseutil.exe /mh <database.edb> command. If it is not in Clean Shutdown state, run Eseuitl.exe /p <database.edb>. Then you can decide how to continue:	4/8/2011
572	Step 4	Reads: 4. Run the Eseutil.exe /r E00 /a command but replace E00... Should read: 4. Run the Eseutil.exe /r E00 /a /i command but replace E00…	4/8/2011

Page	Location	Description	Date corrected
632	Table 14-7, left column head	Reads: Exchange Server 2003 Feature Should read: Exchange Server 2007 Feature	4/8/2011
641	Third bulleted item	Reads: The Active Directory forest mode must not be Windows Server 2008. This bulleted item is no longer valid and should therefore be deleted.	4/8/2011
685	Table 15-1, first row, Requirement column	Reads: The AD DS forest must be at least in Windows Server 2003 forest functionality mode. If Exchange Server 2003 is still in place, the domain functional level supported cannot be higher than Windows Server 2003 until after Exchange Server 2003 has been removed from the environment. The second sentence should be deleted, so the bulleted item should read: The AD DS forest must be at least in Windows Server 2003 forest functionality mode.	4/8/2011
