

Microsoft® Excel® 2013: Building Data Models with PowerPivot

Marco Russo and Alberto Ferrari

ISBN: 978-0-7356-7634-3

First printing: March, 2013

To ensure the ongoing accuracy of this book and its companion content, we've reviewed and confirmed the errors listed below. If you find a new error, we hope you'll report it to us on our website: www.microsoftpressstore.com/contact-us/errata.

Page	Location	Description	Date corrected
29	Figure 1-30 caption	<p>Reads: Figure 1-30 The Categories table is now a column chart.</p> <p>Should read: Figure 1-30 The Office and SalesManager tables have been added to the report.</p>	11/12/2014
65	Toward bottom of page	The period after the Chapter 12 chapter title is missing and should be added. The period should be between "DAX" and the end quotation mark.	
191	Top of page	<p>Reads: Thus, the row context in Filter is nested inside the original row context introduced by the calculated column, which results in "it" being hidden in the innermost expression.</p> <p>Should read: Thus, the row context in FILTER is nested inside the original row context introduced by the calculated column, which results in the outer filter (the calculated column one) being hidden in the innermost expression.</p>	11/12/2014
191	Third full paragraph	<p>Reads: In Figure 7-10 you can see the calculated column defined in DimProduct, where the table has been sorted using ListPrice ascending.</p> <p>Should read: In Figure 7-10, you can see the calculated column defined in DimProduct, where the table has been sorted by using ListPrice descending.</p>	11/12/2014
