**PPP (Point-to-Point Protocol), 142**

- authentication
  - Challenge Handshake Authentication Protocol (CHAP), 143
  - configuring, 144–145
  - Password Authentication Protocol (PAP), 143
- debug ppp authentication command, 146

- encapsulation, 140–142
- show interfaces command, 146
- sublayers
  - link control protocol (LCP), 142–143
  - network control protocol (NCP), 142–143
- troubleshooting configuration, 146
- verifying configuration, 146

**practice exams, 320–321**

**presentation layer, 34**

**privileged exec accesss, 93**

**PVCs (permanent virtual circuits)**

- CIRs, 148
- DLCI, 147
- LMI, 147–148

## Q-R

---

**RAM, 89**

**reconnaissance attacks, mitigating, 190–191**

**reconnecting to router, 237–238, 242**

**reliable transmission, 35, 41**

**remote router management**

- CDP protocol, 115–116
- ICMP protocol, 116–117
- SSH, 114–115
- telnet protocol, 112–113

**restoring Cisco IOS images, 111–112**

**resuming telnet sessions, 113**

**ring topology, 18**

**RIP (Routing Information Protocol), 204**

- administrative distances, 206
- Bellman-Ford algorithm, 211
- configuring, 212–214
- no auto-summary command, 213
- routing metrics, 206–207
- troubleshooting, 214–217
- updates, 211
- verifying configuration of, 214–217
- versions, 211–213

**rogue APs, 178****rollover cable pinouts, terminal session settings, 85-86****ROM (read-only memory), 89****route poisoning (distance vector routing protocol), 209****router configuration mode, Cisco devices, 94****routers**

## Cisco devices

interfaces, enabling, 98

serial ports, configuring, 97

classless routing protocols, 214

compression identifiers, 109

## default routes

configuring with SDM, 242

creating, 203-204

example of, 204

uses, 203

## distance vector protocols

  - Subnet Zero Rule, 70–71

suspending telnet sessions

## **suspending telnet sessions, 113**

### **switches**

- address learning, 125
- ASIC chips (Application-Specific Integrated Circuit), 128
- basic operation of, 124
- Cisco device hostnames, setting, 96
- CLI, 246-247
- collision isolation, 124
- Cut-Through mode, 130
- duplex connections, configuring, 132-133
- exam prep questions, 135-138
- Fragment-Free mode, 131
- frame filters, 127
- frame forwarding, 125-127
- frames per second, 129
- Full-Duplex connections, 131-132
- function of, 124
- Half-Duplex connections, 131
- loops, 133-134
- number of ports, 129
- securing, 98-101
- Store and Forward mode, 130
- STP, loop prevention, 134
- versus bridges, 128-129
- versus hubs, 125-128

### **system requirements, CD-ROM installation, 320**

## **T**

### **TCP (Transmission Control Protocol), 35**

- headers, 40
- port numbers, 38-39
- sliding windows, 37
- three-way handshake, 36-37

### **TCP/IP network model**

- application layer, 46-47
- Internet layer, 46-47
- layers, mapping to OSI model layers, 47

- Network Interface layer, 46-47
- transport layer, 46-47
- versus OSI model, 47

### **technical support, 322**

#### **telnet, 34**

- passwords, enabling for access, 113
- routers, remote management, 112-113
- sessions, resuming/suspending, 34

### **terminal sessions, console port settings, 86**

#### **test modes (CD-ROM)**

- certification mode, 319
- custom mode, 320
- study mode, 319

### **testing connectivity with SDM, 243**

#### **tests (practice), MeasureUp, 320-321**

#### **TFTP (Trivial File Transfer Protocol), 34, 110**

- application layer (OSI), 34
- IOS images
  - backup/restore configurations, 111-112
  - transferring to/from servers, 110-111
- troubleshooting tips, 111

#### **Thicknet (10-Base 5 Ethernet), 124**

#### **Thinnet (10-Base 2 Ethernet), 124**

#### **threats to security, mitigating, 189**

- access attacks, 191-192
- DDoS attacks, 192-193
- reconnaissance attack, 190-191
- WLAN security, 177-178

#### **three-layer hierarchical model, 30**

- access layer, 31
- benefits, 32
- Core layer, 31
- distribution layer, 31

#### **three-way handshake, 36-37**

#### **TKIP (Temporal Key Integrity Protocol), 181**

**topologies**

- bus, 19
- flat, 42
- full mesh, 19
- partial mesh, 19
- point-to-point, 18
- ring, 18
- star, 18

**traceroute command, 116–117****translations, NAT, 164–165****transparent bridges, 125****transport layer (OSI) , 35**

- connection-oriented, 35
- connectionless, 35
- port numbers
  - destination ports, 39
  - IANA ranges, 38–39
  - multiplex connections, 39
  - segments, 40
  - source ports, 39
  - unreliable communication with UDP, 40–41
- reliable communication with TCP, 35–37
- TCP
  - headers, 40
  - port numbers, 38–39
  - sliding windows, 37–38
  - three-way handshake, 36–37
- UDP, 40–41

**troubleshooting**

- Frame Relay configuration, 154–155
- PPP configuration, 146, 214–217

**twisted-pair cabling, 20**

---

**U-V**

---

**UDP (User Datagram Protocol) , 35,**

- headers, 40–41
- port numbers, 38–39
- transport layer, unreliability of connections, 40–41

**unicast frames, forwarding, 125****UNII (Unlicensed National Information Infrastructure) bands, 170****unlicensed radio bands, 170–171****unreliable communication, UDP, 40–41****user credentials, assigning with SDM Express, 230****user exec access, Cisco devices, 93****verifying PPP configuration, 146, 214–217****version 2 command, 213****viruses, 192****VTY lines, 99**
