

Using Albums to Find Music

Like the other categories, you can use Albums to find music quickly and easily.

1. On the Home screen, tap the Music button.
2. Tap Albums. You see a screen showing all of the albums on the iPod touch, organized alphabetically by album title. (The iPod touch ignores “the” in titles.) Under each album, you see the artist for that album.
3. Browse all available albums. (If you browse to the top of the screen, you see the Search tool with which you can search for specific albums. See “Searching for Music” later in this chapter.)
4. To jump to a specific album, tap the letter along the right side of the screen for the album’s name; to jump to an album whose name starts with a number, tap the # symbol at the bottom of the alphabetical index.
5. Tap the album you want to explore. You move to the album’s screen on which you see all of the songs it contains.

My iPod touch

6. Browse the songs on the album.
7. Tap the song you want to play. The song begins to play, and the Now Playing screen appears.
8. Use the Now Playing screen to control the music (covered in detail in the "Playing Music" task later in this section).
