

# Adding a New Photo to Your Game Center Account

In the book I talked about how you can choose a photo on your iPad to use with your Game Center account. If you don't have one you want to use or if you want something new to use, you can use your iPad to snap an entirely new photo.

## >>>step-by-step

To take a new photo straight from Game Center, open Game Center, go to the Me page, tap the frame for your GameCenter photo, and then follow these steps:

1. Tap Take Photo.
2. The Camera app will open. Position the iPad so that you see the image you want to use on the screen. Then tap the camera button to take the picture.
3. You can move the photo by tapping and dragging.
4. Zoom in on the photo by unpinching.
5. When you've got the photo you want, tap Use.
