Page	Location	Description	Date corrected
xxiii	Important note	<p>Reads: You must install the Windows 10 developer tools with Visual Studio 2015</p> <p>Should read: You must install the Universal Windows App Development Tools with Visual Studio 2015.</p>	
xxiv	Important note	<p>If you are having issues with the sample code, you may need to install the Universal Windows App Development Tools as mentioned on page xxiii.</p> <p>To install the Tools from the Windows Control panel, follow these steps:</p> <ol style="list-style-type: none">1. Go to Program and Features in Control Panel.2. In the list, find Visual Studio and select it and click the Change option. A window will load.3. Select the Modify option.4. Under the Features tab go to Windows and Web Development and expand it, then go to Universal Windows App Development Tools and expand that. Look for Windows 10 SDK option and check the box beside it.5. Click the Update button. <p>To install missing tools from within Visual Studio, follow these steps:</p> <ol style="list-style-type: none">1. When you load a project that is marked as 'unavailable,' right-click the project in solution explorer and then click Install Missing Feature(s).2. In the Install Missing Features dialog box, click Insta.3. Close Visual Studio when prompted by the wizard.4. Follow the steps in the wizard – it is probably best to install all features.5. Wait while the install runs – this may take a few minutes.6. Restart Visual Studio, load the project, and rebuild it. This action will download any additional packages required from NuGet that are not already available on your setup.
