

CISCO CCNA NETWORK SIMULATOR

THE MOST POWERFUL ROUTER SIMULATION SOFTWARE FOR HANDS-ON CCNA SKILLS ENHANCEMENT

Cisco® CCNA Network Simulator helps students develop and practice hands-on skills without investing in expensive lab hardware. This state-of-the-art simulator software allows students to

- **Design networks** with the drag-and-drop Boson Network Designer that simulates up to 200 devices using 45 different routers and switches.
- **Practice networking skills** with more than 100 structured CCNA® labs, including 37 standalone labs, 20 sequential labs, 26 scenario labs, and 22 advanced labs.
- **Experience actual network device response** as each simulated routing and switching protocol maintains its own routing and bridging table for true-to-life routing and switching simulation.
- **Reinforce knowledge** with dynamically linked excerpts from the best-selling *CCNA INTRO* and *ICND Exam Certification Guides* by Wendell Odom.

LICENSE SERVER EDITIONS NOW AVAILABLE

Now you can expand your networking laboratory virtually, and without the high cost of hardware, with license server editions of the *Cisco CCNA Network Simulator*.

- **Save money by having multiple students share access to just one license**—Simply decide how many students need access *at the same time* and purchase that many licenses.
- **Allow more students access to virtual networking equipment**—There's no limit to the number of users per workstation.
- **Offer access to hands-on practice exercises outside the classroom and beyond scheduled classroom hours**—Install the license server on your network and allow students to access the simulator from any workstation on the same network.
- **Boost your budget**—The license server editions offer cost savings when compared with the single-user version (ISBN: 1-58720-131-3, U.S. \$149.95).
- **Configure just once**—There's no ongoing maintenance or computer-by-computer registration required.

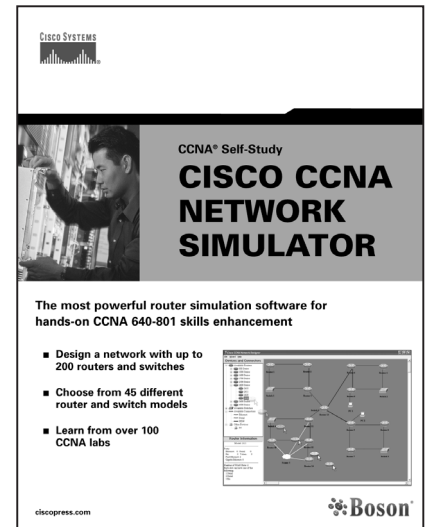

Cisco CCNA Network Simulator, License Server Edition, is **available in three packages** to help make registration easy. All licenses are good for one year.

Cisco CCNA Network Simulator, License Server Edition

Single-Seat License: 1-58720-139-9 • \$112.50

Five-Seat License: 1-58713-155-2 • \$562.50

Twenty-Seat License: 1-58720-138-0 • \$2,250.00

ENHANCE YOUR CLASSROOM WITH *CISCO CCNA NETWORK SIMULATOR*— HERE'S HOW

CASE STUDY ONE: NOT ENOUGH HARDWARE

Here's one example of how the *Cisco CCNA Network Simulator*, License Server Edition, can work in your classroom and extend your laboratory:

Problem: Instructor Smith has 14 students in his CCNA 1 and 2 class, but only enough networking hardware for 4 of them to practice hands-on skills and complete labs. Funds are limited, so purchasing more networking equipment is out of the question, but Smith wants all students to be able to work on labs at the same time.

Solution: Spending budget wisely, Instructor Smith purchases the *Cisco CCNA Network Simulator*, License Server Edition, for 10 workstations and installs it on the internal network. Now all of his students can practice hands-on skills at the same time, as Smith can rotate his students between real hardware and the simulator—4 students working on actual hardware and 10 students working virtually on the simulator.

CASE STUDY TWO: EXTENDING BUDGET

Here's another example of how you can save money with the *Cisco CCNA Network Simulator*, License Server Edition:

Problem: Instructor Jones has 20 students in her CCNA class and access to 10 workstations. Though operating with a limited budget, Jones wants each of her students to use the *Cisco CCNA Network Simulator* to build their own virtual network topologies and practice hands-on skills. Jones is considering the single-user version, but funds aren't available to purchase one for each of her 20 students.

Solution: Jones considers the cost savings available by purchasing the License Server Edition of the software. Since multiple students can access the License Server Edition from a single workstation, Jones can purchase a package for the 10 workstations in her classroom and offer software access to each of her 20 students. Here's a look at the savings of the License Server Edition versus the single-user version in this scenario:

Single-User Version

20 students x \$149.95 = \$2,999.00

License Server Edition

10 workstations x \$112.50 = \$1,125.00

Savings = \$1,874.00

COST COMPARISON SINGLE-USER VERSION VERSUS LICENSE SERVER EDITION

No. of Students	No. of Workstations	Cost of Single-User Version (one per student)	Cost of License Server Edition (one per workstation)	Total Savings
25	20	\$ 3,748.75	\$ 2,250.00 (1 20-seat license)	\$ 1,498.75
20	15	\$ 2,999.00	\$ 1,687.50 (3 5-seat licenses)	\$ 1,311.50
15	8	\$ 2,249.25	\$ 900.00 (1 5-seat license, 3 single-seat licenses)	\$ 1,349.25
10	5	\$ 1,499.50	\$ 562.50 (1 5-seat license)	\$ 937.00
5	1	\$ 749.75	\$ 112.50 (1 single-seat license)	\$ 637.25

FREE 30-DAY TRIAL

Call your Prentice-Hall sales representative to request a **free 30-day trial** of the *Cisco CCNA Network Simulator*, License Server Edition (ISBN: 1-58713-154-4).
