FAQs

What is the Aquo Green Building Initiative?

Aquo's commitment to building the world's most environmentally sustainable bottling facility that not only meets but surpasses current IGBC certification standards.

How large will the Aquo's new bottling plant be, and where will it be located?

- 400,000-square-foot facility on a 25-acre campus
- Located in Southern California, US

What will the key green features of the plant be?

- HFC free HVAC System is 79% more efficient than current state requirements
- More than 70% of energy is produced on site by solar panels
- 11 million gallons of potable water saved each year by using recycled water for cooling, landscaping irrigation and restroom flushing
- Aquo bottles now completely recyclable and biodegradable
- Bottling facility to receive highest level IGBC certification

What are the financial advantages anticipated for Aquo?

- 25% decrease in operating costs
- \$450,000 total energy savings annually
- 12% increase in building's value
- \$19,000 saved per year via reduced water usage
