

## View a Map of the Contact's Location

If you've entered a street address for a contact, you can display a map of that person's location.

- 1 In the Contacts app, tap the name of the contact.
- 2 Scroll down the contact screen to the Address/Other section. (You might need to tap View More to see this section.) Tap the Location Pin icon next to the person's address.
- 3 If prompted, choose to open with the Maps app.

- 4 The contact's location is now shown on the map. Touch and spread your fingers on the screen to zoom into this location, or pinch to zoom out into a larger map.
